Proceedings of the 2024 3rd International Conference on Social Sciences and Humanities and Arts (SSHA 2024) Mohd Fauzi bin Sedon,Intakhab Alam Khan,Mehmet Cüneyt Birkök,KinSun Chan,2024-06-20 This is an open access book With the progress of social civilization social science and its research are becoming more and more important Theoretically and practically the study of social phenomena and social problems and the development of prosperous social sciences are the eternal themes of human beings At present social science research and its results can hardly meet the needs of social development especially the unscientific evaluation of social science results which has aroused great concern from all walks of life and has produced dirt and questions on social science thus affecting the proper development of social science Max Weber once said that the most important function of social science in modern times is to keep people clear headed and to resist the delusions of prophetic legislators Humanities and arts are the process of perceiving realizing thinking manipulating and expressing objective or subjective objects through capturing and excavating feeling and analyzing integrating and applying or displaying the stage results in the form obtained through feeling seeing hearing smelling touching The social sciences and humanities and arts contain content that will directly affect our lives and the way society functions And by reacting to today s increasingly intricate problems and situations through systematic and professional discussions they will further contribute to the improvement of institutions and the development of society By thinking about issues and looking at problems and the world from different perspectives by putting the two together it may be possible to have more comprehensive appropriate and better responses for example the development of laws requires a deeper understanding of the environment in which they are implemented international trade requires a certain understanding of the customs of different countries and the development of tax and economic policies requires a certain understanding of the population consumer demand etc

[Young people, social inclusion and digitalisation](#) Dan Moxon,Adina Marina Şerban,Dunja Potočnik,Nuala Connolly,Lana Pasic,Veronica Ştefan,2021-01-01 Can the digital revolution help us to tackle existing inequalities or does it leave some young people even further behind Is the digital world equally accessible to all young people What are some of the inherent inequalities within the digital sphere Do digital tools enable youth organisations youth workers or state bodies to reach out to marginalised young people Digital methods tools and platforms and their unexplored potential in the youth sector have created much enthusiasm within the youth field This Youth Knowledge publication explores the intersection between digitalisation and social inclusion of young people reflecting especially on how digitalisation affects young people s lives and what the role of youth policy youth work and youth research can be in this respect In these 16 chapters the authors critically examine if and how digitalisation can support the quest for

social inclusion ranging from the exploration of policies tools and platforms available to young people and youth workers in Europe supporting young people s access to education and employment opportunities opening up avenues for digital youth work providing opportunities for participation for young people with disabilities channels of integration for migrant communities and young refugees across Europe and support networks for young LGBTI persons While there is an acknowledgement of the potential for the youth sector to use the possibilities of digitalisation to address social inequality the authors also emphasise that this does not happen automatically and more reflection is needed regarding the accessibility of technology and how our digital approaches can be made inclusive for young people from all backgrounds
