Cyberghetto Or Cybertopia:

Cyberghetto or Cybertopia? Bosah Ebo, 1998-07-28 Computer mediated communication and cyberculture are dramatically changing the nature of social relationships Whether cyberspace will simply retain vestiges of traditional communities with hierarchical social links and class structured relationships or create new egalitarian social networks remains an open question The chapters in this volume examine the issue of social justice on the Internet by using a variety of methodological and theoretical perspectives Political scientists sociologists and communications and information systems scholars address issues of race class and gender on the Internet in chapters that do not assume any specialized training in computer technology

Online Incivility and Public Debate Gina Masullo Chen, 2017-06-25 This book investigates what influence online incivility through user generated comments on news websites has on public debate Built on the premise that public discussions about important topics are vital to a healthy democracy the book analyzes 3 508 online comments in order to understand what factors in comments make them more susceptible to incivility defined as nasty remarks rife with profanity It also examines comments for attributes of deliberation which are discussions across difference supported by evidence and rational arguments Using an experiment the book shows that uncivil comments jumpstart a chain reaction leading first to negative emotion and then to greater intention to get politically involved Overall Online Incivility and Public Debate Nasty Talk argues that while incivility mars online debate it may also spark interest in important topics and allow for positive deliberative moments of quality discussion

The Theory and Criticism of Virtual Texts Lory Hawkes, Joe Law, Christina Murphy, 2000-11-30 Virtual texts have emerged within the realm of the Internet as the predominant means of global communication As both technological and cultural artifacts they embody and challenge cultural assumptions and invite new ways of conceptualizing knowledge community identity and meaning But despite the pervasiveness of the Internet in nearly all aspects of contemporary life no single resource has cataloged the ways in which numerous disciplines have investigated and critiqued virtual texts This bibliography includes more than 1500 annotated entries for books articles dissertations and electronic resources on virtual texts published between 1988 and 1999 Because of the multiple contexts in which virtual texts are studied the bibliography addresses virtual communication across a broad range of disciplines and philosophies It encompasses studies of the historical development of virtual texts investigations of the many interdisciplinary applications of virtual texts and discussions of such legal issues as privacy and intellectual property Entries are arranged alphabetically within topical chapters and extensive indexes facilitate easy access

Chall, 2000 Contains more than 300 000 records covering sociology social work and other social sciences Covers 1963 to the present Updated six times per year *Technology and Nationalism in India* Rohit Chopra, 2008 This book examines the phenomenon of technocultural Hindu nationalism or the use of the internet by global Indian communities for the promotion of Hindu nationalist ideologies Since the introduction of Western science and technology under colonial rule in the eighteenth century science and technology have been used as instruments of transforming Indian society Scientific and technological expertise have been authorized as essential attributes of a modern Indian selfhood And the possessors of technological skills have historically been vested with the authority to speak for the nation The associations between technology and nationalism have

condensed in ideas about self and other they have been incorporated in imaginings of the state and the nation and they have materialized as claims about identity community and society In the present historical moment this relationship manifests itself in one form as an online Hindu nationalism that combines cultural majoritarian claims with technological triumphalism Technocultural Hindu nationalism yokes together the core proposition of Hindu nationalist doctrine the idea that India is a Hindu nation and that religious minorities are outsiders to it with arguments about the imminent rise of Hindu India as a technological superpower in the global capitalist economy of the twenty first century Additionally while technocultural Hindu nationalism is obsessed with Western technology it also defines itself in strategic respects in opposition to Western civilization On Hindu nationalist websites this apparent paradox is resolved through the construction of a narrative where Hinduism is defined as the historical and philosophical foundation of global capitalist modernity itself and Hindus are presented as the natural heirs to that heritage This book locates these and other characteristics of Hindu nationalist identity politics in cyberspace with reference to the relationship between technology and nationalism in India from the period of British colonial rule in the mid eighteenth century to the present era of an economically and technologically interconnected world This book argues that technocultural Hindu nationalism needs to be understood in terms of the general dynamic of technology and nationalism with its continuities and discontinuities through the period of colonial rule till Indian independence in 1947 the period of Nehruvian nationalism with its emphasis on technological development in a socialist framework and the current post 1991 context following the liberalization of the Indian economy which accords pride of place to information technology and the internet This book also proposes that the particularities of technocultural Hindu nationalism need at the same time to be assessed with reference to the modalities of online communication Toward this end the book takes shape as an interdisciplinary endeavor combining qualitative and quantitative research methodologies and drawing on historical scholarship about South Asia social and cultural theory and the sociology of new media specifically the field of internet studies Technology and Nationalism in India is an important book for all in communication Internet studies South Asian studies and postcolonial studies
