Bennett, Anthony M. Townsend, Information technologies have become both a means and an end transforming the workplace and how work is performed This ongoing evolution in the work process has received extensive coverage but relatively little attention has been given to how changing technologies and work practices affect the workers themselves This volume specifically examines the institutional and social environment of the workplaces that information technologies have created Compilations of scholarly essays are often written by members of a particular school of thought whose purpose is to flesh out an area of theory or methodology *Information Technology and the World of Work* takes a different approach these essays are written by diverse voices unified in their interest in the common theme of technology and the changing workplace The authors goals are to present perspectives that raise as many questions as they answer and which are accessible to a broad audience of managers union leaders students and academic readers The chapters are organized into three specific topical areas that represent aspects of workers social and political experiences of work that are affected by technology Part 1 addresses how information technologies affect workers unions Part 2 examines how information technology affects individual employees specifically in terms of employees sense of power and identity Chapters in this section examine the social and psychological reactions of workers within the system Part 3 focuses on one of the most contentious outcomes of this changed workplace reviewing emerging policy and privacy issues that new technologies have created Written with the intent of beginning an important discussion of these issues this volume should provide an impetus for others to make their own contribution to the emerging dialogue on technology in the modern workplace Daphne G Taras is professor of industrial relations and associate dean research in the Haskayne School of Business University of Calgary James T Bennett is professor of economics at George Mason University and founder and editor of the *Journal of Labor Research* Anthony M Townsend is an associate professor of management information systems in the College of Business at

Collective Labour Rights for Self-Employed Workers Charalampos Stylogiannis, 2023-08-22 Platform work arrangements are often defended as an expression of technological progress with the potential to enable people to work as self-employed individuals often without any supervision or control However by now it is well documented that platform work not only shares important features of flexibility and precariousness with other casual work arrangements that are on the rise around the world but it also entails the risk of excluding a significant portion of workers from the protection of fundamental collective labour rights including their coverage from collective agreements In this important and timely book the author shows how a human rights based approach HRBA towards collective labour rights can bridge this protection gap Such an approach identifies workers regardless of their employment status as rights holders that are entitled to rights like the right to collective bargaining derived from international human rights and labour rights instruments Fully describing the phenomenon of platform work as well as presenting a detailed global overview of responses related to the challenges stemming from platform work arrangements the research *inter alia* covers aspects such as the following problems challenges and questions related to platform work arrangements and how those are linked to broader labour market trends platform work's deeper foundational implications for labour law legal developments related to the regulation of platform work with an assessment of their limits when it comes to collective labour rights also recognised as human rights various ways in which platform workers and other atypical workers have managed to exercise their collective labour rights and promising

indications of closer cooperation between organised labour and workers in non standard forms of employment The analysis draws on international human rights and labour rights treaties and conventions domestic legislation and regulations rulings from international and national courts and interpretative and authoritative sources including the relevant legal literature The book manifests and responds to a genuine need for in depth research with respect to the protection of the human rights of platform workers with an analytical framework that will ensure their adequate protection Its crucial observations will be welcomed by practitioners in labour law human rights law and competition law as well as by academics human resources professionals and labour and employment policymakers
