Complex Sciences Jie Zhou, 2009-06-26 I was invited to join the Organizing Committee of the First International Conference on Complex Sciences Theory and Applications Complex 2009 as its ninth member At that moment eight distinguished colleagues General Co chairs Eugene Stanley and Gaoxi Xiao Technical Co chairs János Kertész and Bing Hong Wang Local Co chairs Hengshan Wang and Hong An Che Publicity Team Shi Xiao and Yubo Wang had spent hundreds of hours pushing the conference half way to its birth Ever since then I have been amazed to see hundreds of papers flooding in reviewed and commented on by the TPC members Finally more than 200 contributions were lectured for the proceedings currently in your hands They include about 200 papers from the main conference selected from more than 320 submissions and about 33 papers from the five collated workshops Complexity Theory of Art and Music COART Causality in Complex Systems ComplexCCS Complex Engineering Networks ComplexEN Modeling and Analysis of Human Dynamics MANDYN Social Physics and its Applications SPA Complex sciences are expanding their colonies at such a dazzling speed that it comes literally impossible for any conference to cover all the frontiers

From System Complexity to Emergent Properties Moulay Aziz-Alaoui, Cyrille Bertelle, 2009-08-07 Emergence and complexity refer to the appearance of higher level properties and behaviours of a system that obviously comes from the collective dynamics of that system's components These properties are not directly deducible from the lower level motion of that system Emergent properties are properties of the whole that are not possessed by any of the individual

parts making up that whole Such phenomena exist in various domains and can be described using complexity concepts and thematic knowledges This book highlights complexity modelling through dynamical or behavioral systems The pluridisciplinary purposes developed along the chapters are able to design links between a wide range of fundamental and applicative Sciences Developing such links instead of focusing on specific and narrow researches is characteristic of the Science of Complexity that we try to promote by this contribution

Homotopy of Extremal Problems Stanislav V. Emelyanov, 2007 This monograph provides a thorough treatment of parameter dependent extremal problems with local minimum values that remain unchanged under changes of the parameter The authors consider the theory as well the practical treatment of those problems both in finite dimensional as well as in infinite dimensional spaces Various applications are considered e g variational calculus control theory and bifurcations theory Thorough treatment of parameter dependent extremal problems with local minimum values Includes many applications e g variational calculus control theory and bifurcations theory Intended for specialists in the field of nonlinear analysis and its applications as well as for students specializing in these subjects
