Second Thoughts: Sociology Challenges Conventional Wisdom Janet M. Ruane, Karen A. Cerulo, 2011-06-07 Do birds of a feather flock together or do opposites attract Does haste make waste or should you strike while the iron is hot Adages like these or conventional wisdoms shape our social life This Fifth Edition of *Second Thoughts* reviews several popular beliefs and notes how such adages cannot be taken at face value This unique text encourages students to step back and sharpen their analytic focus with 24 essays that use social research to expose the gray areas of commonly held beliefs revealing the complexity of social reality and sharpening students sociological vision

The Affluent Society John Kenneth Galbraith, 1998 On the economics of abundance

Beyond Ethics to Post-Ethics Peter Baofu, 2011-01-27 This book presents a new theory of ethics that challenges traditional views on morality and immorality It explores the nature of ethics by drawing on various approaches in literature offering a fresh perspective on how to understand morality without favoring any single ideology

The Future of Post-Human Accounting Peter Baofu, 2014-06-03 This book reexamines opposing views on accounting offering a new theory the double sided theory of accounting It explores the dialectic relationship between addition and subtraction considering perspectives from mind nature society and culture with implications for the human future and post human fate

Money Wise A. Michael Lipper, Douglas R. Sease, 2009-09-15 There are now millions of millionaires in the US But if you've gotten there or want to get there what then This book addresses the growing need for the wealthy to understand how to think about their wealth as a guide to how to invest it

The Future of Post-Human Performing Arts Peter Baofu, 2013-01-03 Are the performing arts really supposed to be so radical that as John Cage once said in the context of music there is no noise only sound since he argued that any sounds we can hear can be music WK 2007a D Harwood 1976 This radical tradition in performing arts with music as an example here can be contrasted with an opposing view in the older days when Greek philosophers and medieval theorists in music defined music as tones ordered horizontally as melodies and vertically as harmonies Music theory within this realm is studied with the presupposition that music is orderly and often pleasant to hear WK 2007a Contrary to these opposing traditions and other views as will be discussed in the book performing arts in relation to both the body and its presence is neither possible nor desirable to the extent that the respective ideologues on different sides would like us to believe Needless to say the challenge to these opposing traditions in performing arts does not imply that performing arts are worthless human endeavors or that those fields of study related to performing arts like aesthetics acoustics communication studies psychology culture studies sociology religion morality and so on should be rejected too Of course neither of these extreme views is reasonable Instead this book provides an alternative better way of understanding the future of performing arts especially in the dialectic context of the body and its presence while learning from different approaches in the literature but without favoring any one of them or integrating them since they are not necessarily compatible with each other In other words this book offers a new theory

that is the transdisciplinary theory of performing arts to go beyond the existing approaches in a novel way If successful this seminal project will fundamentally change the way that we think about performing arts from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what the author originally called its post human fate The Future of Post-Human War and Peace Peter Baofu,2010-04-16 Is peace really so precious that it is popularly viewed in irenology peace studies of our time as natural and a prime force in human behavior whereas war its opposite is instead condemned as sinful and not natural In fact there is even the prestigious Nobel peace prize to be awarded to those who contribute to world peace but not an equivalent Nobel war prize to those who do the contrary This euphoric view of peace is by no means a constant conventional wisdom in human history as it can be sharply contrasted with an equally seductive view of war in polemology war studies For instance only several decades ago the well known writer Thomas Mann once approvingly asked about war Is not peace an element of civil corruption and war a purification a liberation an enormous hope WK 2009a This fickleness of conventional wisdom on war and peace has blinded us from the dark sides of both war and peace with the consequence of impoverishing our understanding of the human condition and its future Contrary to the two opposing sides of this conventional wisdom in its fickle history war and peace are neither possible nor desirable to the extent that their respective ideologues would like us to believe In addition war and peace cannot exist with each other Of course this is not to suggest that irenology peace studies and polemology war studies are worthless or that other fields of study related to war studies and peace studies like political science economics psychology sociology international relations history anthropology religious studies gender studies as well as a variety of others should be ignored WK 2009 Needless to say neither of these two extreme views is reasonable either Instead this book accepts the challenging task to provide an alternative better way to understand the nature of war and peace especially in relation to aggression and pacificity while learning from different approaches in the literature but without favoring any one of them nor integrating them since they are not necessarily compatible with each other Thus this book offers a new theory to transcend the existing approaches in the literature on war and peace in a way not conceived before If successful this seminal project is to fundamentally change the way that we think about war and peace from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what I originally called its post human fate **Untruth** Robert J. Samuelson,2001-02-06 In Untruth Newsweek and Washington Post columnist Robert J Samuelson explains why our political economic and cultural debates so routinely traffic in misinformation popular fads that like meteors momentarily burn brightly in public consciousness and then fizzle out Advocacy groups politicians and their unwitting allies in the media instinctively create agendas of problems that afflict society and must be solved The problems are often exaggerated and oversimplified and the result is that the public is misled about what is wrong and how easily it can be made right Untruth is the first collection of Samuelson s insightful assaults on the conventional wisdom Included are columns arguing that

campaign contributions have not corrupted politics that the service economy is not turning America into a nation of hamburger flippers and that the Internet isn't the most important invention since the printing press

Bernard Brodie and the Foundations of American Nuclear Strategy Barry Howard Steiner,1991 Steiner analyzes how and why Brodie's understanding of weapons of unparalleled explosive force led him to posit the need for revolutionary strategic thinking in broadminded analytic method and in the focus upon cities as nuclear targets He shows the tremendous effect Brodie's work had on the intellectual climate in which policy is determined particularly in his frequent combatting of conventional wisdom

Against The Conventional Wisdom Douglas Dowd,2019-04-10 For the past twenty five years the United States has undergone a retrogression in its socioeconomic policies facilitated and supported by most economists thanks to the steady drumbeat of arguments by entrepreneurs and politicians who celebrate the free market for anything and everything and who advocate among other follies balanced budgets and r
