In celebration of cooperatives' contributions to community development processes and outcomes worldwide, the United Nations designated 2012 as the Year of the Cooperative. Today, as in the past, cooperatives have proved effective in bringing people and organizations together to accomplish a broad array of goals related to fostering social and economic innovation, protecting communities against poor living and working conditions, and promoting a better quality of life. Analytically, as both a movement and as a business model, cooperatives hold much potential for generating the types of synergies, collaboration, and productive and social processes that enable community development to thrive in a variety of local, regional, and global contexts. This collection of articles chronicles new developments in the ways in which cooperatives are used in a diverse array of community contexts. They offer insight as to what these changes mean both empirically and theoretically for community development in the decades to come.
