

CONTROLLING CORRUPTION

Robert
Klitgaard

Controlling Corruption

**Augustine Ruzindana, Petter
Langseth, Arthur Gakwandi**

Controlling Corruption:

Controlling Corruption Robert Klitgaard, 1988-03-07 Corruption is increasingly recognized as a preeminent problem in the developing world Bribery extortion fraud kickbacks and collusion have resulted in retarded economies predator elites and political instability In this lively and absorbing book Robert Klitgaard provides a framework for designing anti corruption policies and describes through five case studies how courageous policymakers were able to control corruption

Controlling Corruption Robert Williams, Alan Doig, 2000 **Controlling Corruption** Bo Rothstein, 2021 This book presents a radically new approach of how societies can bring corruption under control Since the late 1990s the detrimental effects of corruption to human well being have become well established in research This has resulted in a stark increase in anti corruption programs launched by international organizations such as the World Bank the African Union the EU as well as many national development organizations Despite these efforts evaluations of the effects of these anti corruption programs have been disappointing As it can be measured it is difficult to find substantial effects from such anti corruption programs The argument in this book is that this huge policy failure can be explained by three factors Firstly it argues that the corruption problem has been poorly conceptualized since what should count as the opposite of corruption has been left out Secondly the problem has been located in the wrong social spaces It is neither a cultural nor a legal problem Instead it is for the most part located in what organization theory defines as the standard operating procedures in social organizations Thirdly the general theory that has dominated anti corruption efforts the principal agent theory is based on serious misspecification of the basic nature of the problem The book presents a reconceptualization of corruption and a new theory drawing on the tradition of the social contract to explain it and motivate policies of how to get corruption under control Several empirical cases serve to underpin this new theory ranging from the historical organization of religious practices to specific social policies universal education gender equality and auditing Combined these amount to a strategic theory known as the indirect approach **Controlling Corruption in Europe** Alina Mungiu-Pippidi, 2013-09-18 Corruption has an impact

It is about time that anticorruption starts having an impact too This is the first annual policy report of the European Seventh Framework Research Project ANTICORRP which has started in 2012 and will continue until 2018 Based on the work of 21 different research centers and universities gathering original data ANTICORRP offers yearly updates on the latest from corruption research analyzing both the consequences of corruption and the impact of policies attempting to curb it This first report offers a methodology to evaluate corruption risk and quality of government at country region and sector level by means of corruption indicators that are sensitive to change and policy intervention The aim of the project is to offer testable easy to handle policies which reduce corruption risk Corruption distorts market competition bolsters deficits on behalf of discretionary spending hurts real investment in public health and education reduces tax collection detriments the absorption rate of EU funds and generates vulnerable employment and brain drain This study estimates that if EU member states would

all manage to control corruption at the Danish level tax collection in Europe would increase by 323 billion Euro per year double of the EU budget for 2013

Fighting Corruption in Public Procurement Sope Williams,2012-11-06 This book examines the issues and challenges raised by the debarment or disqualification of corrupt suppliers from public contracts comparing and contrasting the legal practical and institutional approaches to the implementation of the disqualification

Controlling Corruption Bo Rothstein,2021-03-18 This book presents a radically new approach of how societies can bring corruption under control Since the late 1990s the detrimental effects of corruption to human well being have become well established in research This has resulted in a stark increase in anti corruption programs launched by international organizations such as the World Bank the African Union the EU as well as many national development organizations Despite these efforts evaluations of the effects of these anti corruption programs have been disappointing As it can be measured it is difficult to find substantial effects from such anti corruption programs The argument in this book is that this huge policy failure can be explained by three factors Firstly it argues that the corruption problem has been poorly conceptualized since what should count as the opposite of corruption has been left out Secondly the problem has been located in the wrong social spaces It is neither a cultural nor a legal problem Instead it is for the most part located in what organization theory defines as the standard operating procedures in social organizations Thirdly the general theory that has dominated anti corruption efforts the principal agent theory is based on serious misspecification of the basic nature of the problem The book presents a reconceptualization of corruption and a new theory drawing on the tradition of the social contract to explain it and motivate policies of how to get corruption under control Several empirical cases serve to underpin this new theory ranging from the historical organization of religious practices to specific social policies universal education gender equality and auditing Combined these amount to a strategic theory known as the indirect approach

Controlling Security in a Culture of Fear Mireille Hildebrandt,Abiola Makinwa,Anna Oehmichen,2009 A team from the Dutch Research School on Safety and Justice organized a conference in Leyden in November 2008 and the presentations there have been collected here under the same title Criminologists legal scholars and other contributors consider such topics as doing justice in a world of strangers the political reasons for tackling anti social behavior investigating the axioms of precautionary logic the idea of protection in Dutch juvenile criminal justice criminal law perspectives on sexual HIV exposure and transmission and resilience joins research in vulnerability of economic activity to crime Also a film and photography scholar suggests how the really boring pictures on video surveillance might affect viewers particularly their alertness Distributed in the US by ISBS Annotation 2010 Book News Inc Portland OR booknews com
