## **Copernican Questions:**

**The Copernican Question** Robert Westman,2020-04-21 In 1543 Nicolaus Copernicus publicly defended his hypothesis that the earth is a planet and the sun a body resting near the center of a finite universe But why did Copernicus make this bold proposal And why did it matter The Copernican Question reframes this pivotal moment in the history of science centering the story on a conflict over the credibility of astrology that erupted in Italy just as Copernicus arrived in 1496 Copernicus engendered enormous resistance when he sought to protect astrology by reconstituting its astronomical foundations Robert S Westman shows that efforts to answer the astrological skeptics became a crucial unifying theme of the early modern scientific movement His interpretation of this long sixteenth century from the 1490s to the 1610s offers a new framework for understanding the great transformations in natural philosophy in the century that followed

**Copernican Questions: A Concise Invitation to the Philosophy of Science** Keith Parsons,2005-09-14 This provocative focused and succinct new text addresses two issues integral to the study of the philosophy of science the rationality of science and the realism question Students are invited to think deeply about salient issues as they explore collections of cases and examples beginning by considering the founding document of modern science Copernicus s *On the Revolutions of the Heavenly Spheres* and including discussions of other key readings such as Thomas Kuhn s *The Structure of Scientific Revolutions* Author Keith Parsons challenges students thinking offering his own views while providing a solid foundation for debate

**Burning Questions in Historic Christianity** John Alfred Faulkner,1930 [Routledge Philosophy Guidebook to Kant and the Critique of Pure Reason](#) Sebastian Gardner,1999 Kant s *Critique of Pure Reason* is arguably the single most important work in western philosophy The book introduces and assesses Kant s life and background of the *Critique of Pure Reason* the ideas and text of the *Critique of Pure Reason* the continuing relevance of Kant s work to contemporary philosophy Ideal for anyone coming to Kant s thought for the first time This guide will be vital reading for all students of Kant in philosophy

**Newton** Andrew Janiak,2015-02-23 This book takes a distinct angle on his life and work

**It Started with Copernicus** Keith Parsons,2014-08-05 A unique approach to the philosophy of science that focuses on the liveliest and most important controversies surrounding science Is science more rational or objective than any other intellectual endeavor Are scientific theories accurate depictions of reality or just useful devices for manipulating the environment These core questions are the focus of this unique approach to the philosophy of science Unlike standard textbooks this book does not attempt a comprehensive review of the entire field but makes a selection of the most vibrant debates and issues The author tackles such stimulating questions as Can science meet the challenges of skeptics Should science address questions traditionally reserved for philosophy and religion Further does science leave room for human values free will and moral responsibility Written in an accessible jargon free style the text succinctly presents complex ideas in an easily understandable fashion By using numerous examples taken from diverse areas such as evolutionary theory paleontology and astronomy the author

piques readers curiosity in current scientific controversies Concise bibliographic essays at the end of each chapter invite readers to sample ideas different from the ones offered in the text and to explore the range of opinions on each topic Rigorous yet highly readable this excellent invitation to the philosophy of science makes a convincing case that understanding the nature of science is essential for understanding life itself *Pierre Gassendi* B. Brundell,2012-12-06

Pierre Gassendi 1592 1655 lived in three civilizations in the span of one life time medieval ecclesiastic Renaissance humanist and modern and he never cut himself loose from any of them It is probably scientific because he managed to be at home in all three that history has allocated to him a position somewhere on the fringe of the inner circle of genius in the seventeenth century scientific revolution While he was not a front runner Gassendi was nevertheless a pioneer of modern corpuscularianism and his influence on the development of empirical science was truly international It is precisely because Gassendi was a figure of the second rank a significant but lesser luminary that we need to examine his work closely for the less famous contemporaries help us to explain what the great ones do It might seem that Gassendi has received his share of attention from scholars even though it is sometimes suggested otherwise Several full length monographs have been published in the past three decades and there have been a number of articles in scholarly journals Yet despite the indisputable worth of these studies the picture of Gassendi that has emerged from them has been partial and at times wide of the mark so that the true story remains to be told *Cultivating Personhood* Stephen Palmquist,2010 Authors from all over the world unite in an effort to cultivate dialogue between Asian and Western philosophy The papers forge a new East West comparative path on the whole range of issues in Kant studies The concept of personhood crucial for both traditions serves as a springboard to address issues such as knowledge acquisition and education ethics and self identity religious political community building and cross cultural understanding Edited by Stephen Palmquist founder of the Hong Kong Philosophy Caf and well known for both his Kant expertise and his devotion to fostering philosophical dialogue the book presents selected and reworked papers from the first ever Kant Congress in Hong Kong held in May 2009 Among others the contributors are Patricia Kitcher New York City USA G nther Wohlfahrt Wuppertal Germany Cheng Chung ying Hawaii USA Sammy Xie Xia ling Shanghai China Lau Chong fuk Hong Kong Anita Ho Vancouver Kelowna Canada Ellen Zhang Hong Kong Pong Wen berng Taipei Taiwan Simon Xie Shengjian Melbourne Australia Makoto Suzuki Aichi Japan Kiyoshi Himi Mie Japan Park Chan Goo Seoul South Korea Chong Chaeh yun Seoul South Korea Mohammad Raayat Jahromi Tehran Iran Mohsen Abhari Javadi Qom Iran Soraj Hongladarom Bangkok Thailand Ruchira Majumdar Kolkata India A T Nuyen Singapore Stephen Palmquist Hong Kong Christian Wenzel Taipei Taiwan Mario Wenning Macau **The Question-box Answers** Bertrand Louis Conway,1903 **U.S. Geological Survey Professional Paper** ,1987 **Future Survey Annual 1984** World Future Society,1984-06-01 Congress of Arts and Science Howard Jason Rogers,1905 **Renewal in Education** San Mateo County (Calif.).
