Algebraic Geometry. Sundance 1986 Audun Holme, Robert Speiser,1988-05-25 This proceedings volume centers on new developments in rational homotopy and on their influence on algebra and algebraic topology Most of the papers are original research papers dealing with rational homotopy and tame homotopy cyclic homology Moore conjectures on the exponents of the homotopy groups of a finite CW c complex and homology of loop spaces Of particular interest for specialists are papers on construction of the minimal model in tame theory and computation of the Lusternik Schnirelmann category by means articles on Moore conjectures on tame homotopy and on the properties of Poincar series of loop spaces **Fields**

Medallists' Lectures Michael Atiyah, Daniel Iagolnitzer,1997-10-13 Although the Fields Medal does not have the same public recognition as the Nobel Prizes they share a similar intellectual standing It is restricted to one field that of mathematics and an age limit of 40 has become an accepted tradition Mathematics has in the main been interpreted as pure

mathematics and this is not so unreasonable since major contributions in some applied areas can be and have been recognized with Nobel Prizes The restriction to 40 years is of marginal significance since most mathematicians have made their mark long before this age A list of Fields Medallists and their contributions provides a bird s eye view of mathematics over the past 60 years It highlights the areas in which at various times greatest progress has been made This volume does not pretend to be comprehensive nor is it a historical document On the other hand it presents contributions from 22 Fields Medallists and so provides a highly interesting and varied picture The contributions themselves represent the choice of the individual Medallists In some cases the articles relate directly to the work for which the Fields Medals were awarded In other cases new articles have been produced which relate to more current interests of the Medallists This indicates that while Fields Medallists must be under 40 at the time of the award their mathematical development goes well past this age In fact the age limit of 40 was chosen so that young mathematicians would be encouraged in their future work The Fields Medallists Lectures is now available on CD ROM Sections can be accessed at the touch of a button and similar topics grouped together using advanced keyword searches
