Intercultural Communication Houman A. Sadri,Madelyn Flammia,2011-03-03 *Strategic Narratives* Alister Miskimmon,Ben O'Loughlin,Laura Roselle,2014-02-18 Communication is central to how we understand international affairs Political leaders diplomats and citizens recognize that communication shapes global politics This has only been amplified in a new media environment characterized by Internet access to information social media and the transformation of who can communicate and how Soft power public diplomacy 2 0 network power scholars and policymakers are concerned with understanding what is happening This book is the first to develop a systematic framework to understand how political actors seek to shape order through narrative projection in this new environment To explain the changing world order the rise of the BRICS the dilemmas of climate change poverty and terrorism the intractability of conflict the authors explore how actors

form and project narratives and how third parties interpret and interact with these narratives The concept of strategic narrative draws together the most salient of international relations concepts including the links between power and ideas international and domestic and state and non state actors The book is anchored around four themes order actors uncertainty and contestation Through these Strategic Narratives shows both the possibilities and the limits of communication and power and makes an important contribution to theorizing and studying empirically contemporary international relations International Studies Association International Communication Best Book Award

Infrastructure Communication in International Relations Carolijn van Noort,2020-11-09 This book demonstrates how infrastructure projects and the communications thereof are strategized by rising powers to envision progress to enhance the actor s international identity and to substantiate and leverage the actor s vision of international order While the physical aspects of infrastructure are important infrastructure communication in international relations demands more scholarly attention Using a case study approach Carolijn van Noort examines how rising powers communicate about infrastructure internationally and discusses the significance of these communication practices The four case studies include BRICS s summit communications about infrastructure Brazil s infrastructure promises to Africa China s communication of the Belt and Road Initiative in East Africa and Kazakhstan s news media coverage of China s Belt and Road Initiative Van Noort highlights the fact that the link between infrastructure identity and order making is arbitrary and thus contested in practice with rising powers operationalizing infrastructure communication in international relations in varied ways She argues that both communication organization and the visuality of strategic narratives on infrastructure influence the international communication of infrastructure vision and action plans with different levels of success Infrastructure Communication in International Relations is a welcome and timely book of interest to students and scholars in the fields of international relations global communications and the politics of infrastructure
