Communication And Social Influence Processes:

Communication and Social Influence Processes Charles R. Berger, Michael Burgoon, 1995 *Communication and Social Influence Processes* examines the relationships between verbal and nonverbal communicative activity and social influence processes in a new light. The authors of the eight essays contained in this work have abandoned the narrow constraints of the standard experimental paradigm and move toward redefining the relationships between communication and social influence processes. This volume does not look at the social influence venue as one in which a single source disseminates a message to an audience as an individual presenting a public speech. Instead, social influence is viewed from a broad array of perspectives including individual level processes like cognition, language, and personality interaction based processes like deception, compliance, gaining, and social exchange, and macro social network interactions.

The Social Influence Processes James T. Tedeschi, 2017-07-12 Social psychologists have always been concerned with two person interactions and the factors enabling one person to gain dominance. Although social psychology has devised a revolutionary set of techniques to investigate the phenomenon of power, hypotheses are too often ambiguously stated, research programs end in cul de sacs, and experiments take on the character of one shot studies. In an attempt to stimulate new directions in research and to provide cumulative emphasis on the development of scientific theory in the area of power relations, Tedeschi has assembled original and path breaking essays from a dozen outstanding scholars and researchers in the behavioral sciences. More tightly integrated than leading books in the field of power relations, *The Social Influence Processes* focuses on two person interactions. A full explanation of the terms power and influence is followed by an analysis of the major variables in connections between two persons that must be taken into account in a scientific theory of social influence. The subsequent chapters respond to the categories established, attempting a comprehensive construction of social reality and offering suggestions and techniques for measuring and ordering its complexity. Particular areas of research and theory are isolated for consideration in depth, such topics as personality as a power construct, Power and Personality by Henry L. Mintzberg, influence in exchange theory, The Tactical Use of Social Power by Andrew Michener and Robert W. Suchner, and leadership through charisma, Interpersonal Attraction and Social Influence by Elaine Walster and Darcy Abrahams. In the final chapter, Tedeschi, Thomas Bonoma, and Barry R. Schlenker attempt to provide a general theory of social influence processes as they affect the target individual by reviewing the research literature in their own theoretical terms. This remarkable volume will be of interest to students as well.
