Redesigning America's Community

Colleges Thomas R. Bailey, Shanna Smith Jaggars, Davis Jenkins, 2015-04-09 In the United States 1 200 community colleges enroll over ten million students each year nearly half of the nation s undergraduates Yet fewer than 40 percent of entrants complete an undergraduate degree within six years This fact has put pressure on community colleges to improve academic outcomes for their students Redesigning America s Community Colleges is a concise evidence based guide for educational leaders whose institutions typically receive short shrift in academic and policy discussions It makes a compelling case that two year colleges can substantially increase their rates of student success if they are willing to rethink the ways in which they organize programs of study support services and instruction Community colleges were originally designed to expand college enrollments at low cost not to maximize completion of high quality programs of study The result was a cafeteria style model in which students pick courses from a bewildering array of choices with little guidance The authors urge administrators and faculty to reject this traditional model in favor of guided pathways clearer more educationally coherent programs of study that simplify students choices without limiting their options and that enable them to complete credentials and advance to further education and the labor market more quickly and at less cost Distilling a wealth of data amassed from the Community College Research Center Teachers College Columbia University Redesigning America s Community Colleges offers a fundamental redesign of the way two year colleges operate stressing the integration of services and instruction into more clearly structured programs of study that support every student s goals

After Admission James E. Rosenbaum, Regina Deil-Amen, Ann E. Person, 2007-01-04 Enrollment at America's community colleges has exploded in recent years with five times as many entering students today as in 1965 However most community college students do not graduate many earn no credits and may leave school with no more advantages in the labor market than if they had never attended Experts disagree over the reason for community colleges' mixed record Is it that the students in these schools are under prepared and ill equipped for the academic rigors of college Are the colleges themselves not adapting to keep up with the needs of the new kinds of students they are enrolling In *After Admission* James Rosenbaum Regina Deil Amen and Ann Person weigh in on this debate with a close look at this important trend in American higher education *After Admission* compares community colleges with private occupational colleges that offer accredited associates degrees The authors examine how these different types of institutions reach out to students teach them social and cultural skills valued in the labor market and encourage them to complete a degree Rosenbaum Deil Amen and Person find that community colleges are suffering from a kind of identity crisis as they face the inherent complexities of guiding their students towards four year colleges or to providing them with vocational skills to support a move directly into the labor market This confusion creates administrative difficulties and problems allocating resources However these contradictions do not have to pose problems for students *After Admission* shows that when colleges present students with clear pathways students can effectively navigate the system in a way that fits their needs The occupational colleges the authors studied employed close monitoring of student progress regular meetings with advisors and peer cohorts and structured plans for helping students meet career goals in a timely fashion These procedures helped keep students on track and the authors suggest could have the same effect if implemented at community colleges As college access grows in America institutions must adapt to meet the needs of a new generation of students *After Admission* highlights organizational innovations that can help guide students more effectively through higher education

Aspirations to Achievement Center for Community College Student Engagement,2014 Consistently and unmistakably data show a persistent gap separating Latinos and Black males from other student groups on measures of academic progress and college completion These gaps exist across higher education They are undeniable and unacceptable Men of color have high aspirations when they begin higher education Why are these aspirations not matched by similarly high outcomes Until higher education institutions fully embrace the charge of eliminating this disparity we cannot effectively serve our students our communities our national economy or our democracy There are two reasons that community colleges can and should take the lead in this work First community colleges open their doors to all students and they are the higher education institutions most likely to serve men of color Second open access is just the first step toward attaining the equity ingrained in the mission of community colleges The more significant work is ensuring that every student has the support he or she needs to succeed If community colleges can make this experience the norm for every student the gaps will close The Center for Community College Student Engagement has spent the past two years exploring data related to men of color in community colleges Center staff members have worked with experts in the field listened systematically to students and conducted new analyses of Center data The result is actionable practical information that colleges can use to create the conditions for success The issues discussed in this report can be deeply personal and emotionally difficult Moreover they play out against the backdrop of both the nation s history and the continuing reality of inequity across American social systems including health child welfare employment criminal justice and education at all levels These larger societal issues provide important context but this report has a narrower focus Directed to community college educators it adds to a body of work by respected scholars and practitioners It seeks to build understanding of the experiences of Latinos and Black males in community colleges and offers strategies colleges should consider as they work to strengthen those experiences so they lead to better outcomes
