Community Organizing and Community Building for Health Meredith Minkler, 2005 **Community Organizing** Mike Miller, 2012-04-01 This book provides a brief introduction to what is variously called faith based congregation based and institution based community organizing Grounded in a composite case study of an actual organizing effort it shows how local communities can be organized for power Key organizing concepts and strategies are illustrated with stories of real encounters with leaders communities and powerful opposition figures In the approach described here civic and religious institutions come together to give the community a collective voice Organizers help a community build a powerful organization rooted in core values of democracy and the social justice teachings of the world s great religious traditions Saul Alinsky developed the foundations of the tradition of organizing described here an approach that remains dominant in the U S today Alinsky rooted power deeply in the lives relationships and institutions of marginalized and oppressed people In his early organizing days his organizations brought together a wide range of institutions religious congregations and labor unions as well as mutual aid self help athletic sororal and fraternal neighborhood and other voluntary associations By the late 1970s as non congregational neighborhood associations fell into decline organizers in the Alinsky tradition started looking more carefully at how to sustain the vibrancy of the religious institutions that remained Organizers sought to help congregation members become co creators rather than consumers of the life of their churches and worked to help members connect their faith more directly to action in the world In this way they helped make both faith and the action more meaningful This little book tells the story of one congregation that was a member of a broadly based community organization and how a community organizer assisted its development as a true community *Innovative Approaches for Teaching Community Organization Skills in the Classroom* Donna Hardina, 2000 This accessible and comprehensive book will help social work educators efficiently teach students methods of practice that they need to know in order to offer the best services to clients with a variety of different needs in a variety of settings Containing many assignments and exercises that combine new technology with progressive ideas about integrating theory and practice this valuable guide consistently addresses

Gittel, Avis Vidal, 1998-06-10 *Community Organizing* provides new insight into an important national challenge how to stimulate the formation of genuinely community based organizations and effective citizen action in neighborhoods that have not spawned these efforts spontaneously Since Robert Putnam's identification of the role of social capital in regional governance and economic development there has been a virtual industry of interest and action created around the implications of his findings for the development of low income communities Yet there remains a paucity of detailed empirical effort testing and refining his ideas

This book attempts to fill this gap Community Organizing distills lessons from a national demonstration program that employed a novel approach to community organizing consensus organizing Consensus organizing enhances social capital building both stronger internal ties and capacity in low income communities and fostering new relations bridges between residents of low income communities and larger metropolitan area support communities Using evaluation research and detailed comparative study of community development activity in three diverse demonstration sites Ross Gittel and Avis Vidal identify key elements of building social capital which strongly affect community development comprehension of community development credibility of effort and participants confidence competence and constructive critiques of efforts Other elements are more relevant to program management and implementation and include communication among participants congruence of program effort management of inherent contradiction and adjusting implementation to reflect local context This book describes the limits and promise of building social capital and will be of interest to community development students and professionals
