Community Psychiatric Nursing Myth And Reality:

Reflections on Community Psychiatric Nursing Tony Gillam, 2003-09-02 Reflections on Community Psychiatric Nursing provides new insights into many aspects of the CPN's work. Written by a practising CPN, this is a lively and easy-to-read introduction to the key debates in community mental health, covering issues including professional identity, the community and the role of the nurse, teaching, assessment and clinical supervision, good practice and the concept of risk, mental health promotion, user involvement, treatment from medication to psychosocial interventions. This text is essential reading for students and those undertaking further training as CPNs. In addition, practising nurses and other professionals will find it useful in developing their own reflective practice as well as offering a useful overview of an increasingly important area of nursing.

Community Psychiatric Nursing Charles Brooker and Edward White, 2013-12-11 **Challenging Ideas in Psychiatric Nursing** Liam Clarke, 2003-09-01 Challenging Practice in Mental Health Nursing questions theories and practices which have become central in mental health care today. The book is inspired by the growing concerns of both the public and professionals about accepted methods of practice and their effects on patients and clients. Liam Clarke argues that while many different theories and models exist, their validity and effectiveness in caring for patients has yet to be proved. Chapters examine holism, Rogerian and other counselling theories, forensic psychiatry, rational emotive therapy. This will be an essential and thought-provoking read for nurses and other mental health professionals who want to develop as critical practitioners.

Psychiatric and Mental Health Nursing Stephen Tilley, 2008-04-15 Psychiatric and Mental Health Nursing: The Field of Knowledge provides an analytical and critical introduction to the current state of knowledge in psychiatric and mental health nursing in the UK. The first section of the book explores current professional disciplinary and educational contexts. In the second section, leading UK authors from diverse academic settings provide case studies of the knowledge and scientific traditions they draw on to inform their practice, understand patient needs and foster different aspects of nursing practice. In the final section, the UK authors comment on each other's accounts. Those chapters and comments are then discussed by leading overseas academics to provide an invaluable international perspective. The final stage is a sociologically informed analysis which identifies sociopolitical trends in order to make sense of the UK and international views. The editor then assesses the potential for intellectual integration and collective advance in psychiatric and mental health nursing.
