The Alienated Academy Wen-hsin Yeh, 2020-03-17 The enormous changes in twentieth century Chinese higher education up to the Sino Japanese War are detailed in this pioneering work Yeh examines the impact of instruction in English and of the introduction of science and engineering into the curriculum Such innovations spurred the movement of higher education away from the gentry academies focused on classical studies and propelled it toward modern middle class colleges with diverse programs Yeh provides a typology of Chinese institutions of higher learning in the Republican period and detailed studies of representative universities She also describes student life and prominent academic personalities in various seats of higher learning Social changes and the political ferment outside the academy affected students and faculty alike giving rise as Yeh contends to a sense of alienation on the eve of war

American Exodus Charlotte Brooks, 2019-08-27 In the first decades of the 20th century almost half of the Chinese Americans born in the United States moved to China a relocation they assumed would be permanent At a time when people from around the world flocked to the United States this little noticed emigration belied America's image as a magnet for immigrants and a land of upward mobility for all Fleeing racism Chinese Americans who sought greater opportunities saw China a tottering empire and then a struggling republic as their promised land *American Exodus* is the first book to explore this extraordinary migration of Chinese Americans Their exodus shaped Sino American relations the development of key economic sectors in China the character of social life in its coastal cities debates about the meaning of culture and modernity there and the U S government's approach to citizenship and expatriation in the interwar years Spanning multiple fields exploring numerous cities and crisscrossing the Pacific Ocean this book will appeal to anyone interested in Chinese history international relations immigration history and Asian American studies

Disarming the Allies of Imperialism Michael G. Murdock, 2010-03-31 This study provides a striking new explanation of how China's Nationalist Party GMD defeated its rivals in the revolution of 1922 1929 and helped bring some degree of unification to a country torn by class regional and ideological interests *Disarming the Allies of Imperialism* argues that inconsistency more than culture ideology or any other factor gave nationalism its unique edge Revolutionary leaders manipulated revolutionaries and non revolutionaries alike to advantage their own positions and seize national power sometimes seeking to protect foreign lives and property and shield Chinese merchants from agitative disruptions sometimes voting to do the opposite Exploiting the symbiotic yet contradictory relationship between state building which sought foreign ties and international recognition and low level agitators committed to confrontational anti imperialist objectives top Guomindang leaders were able to manipulate political circumstances to their own benefit For example party leaders stirred up anti Christian sentiment pitting popular forces against mission schools while simultaneously intervening to rescue these same schools from agitative destruction thus helping missionaries to soften their attitudes toward the revolution and eventually embrace the new order Scholars of modern Chinese history and anyone familiar with the growing literature on nationalism will appreciate this work for its elucidation of a complex historical snarl while undergraduates and scholars outside the China field will find this a useful and accessible study as well

Hartnett, 1998 This volume examines Chinese higher education during each of the major periods of its development with a special focus on the indigenous factors unique to the Chinese cultural political heritage
