Community Strategic Visioning Programs:

Community Visioning Programs Norman Walzer, Gisele F Hamm, 2017-10-02 Communities have practiced strategic planning for decades using a variety of tools and programs based on the initial Take Charge programs of the early 1990s. These efforts generated a large amount of research regarding their effectiveness as well as ways to measure long term outcomes and other related issues in efforts to better understand the process of community change. This book provides contributions written by researchers and practitioners describing both visioning and other strategic planning efforts. The Great Recession challenged the future of many small and medium sized cities especially in non metropolitan areas renewing the interests of community leaders and elected officials in finding innovative ways to revitalize their local employment base and economic opportunities. Having access to a collection of best practices and successful approaches can greatly assist these practitioners in selecting strategies and techniques for use in their community efforts. The material in this book is especially useful because it includes both methodologies as well as case studies of how and why various approaches used in alternative cultural settings have succeeded. This book was originally published as a special issue of Community Development.

Community Strategic Visioning Programs Norman Walzer, 1996-09-24 Community visioning and strategic planning programs have become increasingly important in recent years as local governments in rural areas have searched for innovative ways to revitalize their local economies or manage population growth. A panel of experts describes local government programs in ten states. They also evaluate the effectiveness in reaching the vision and objective set forth in these programs. The authors examine the main components of each program and offer insights into factors contributing to its success. Major attention is paid to the need for social capital benchmarking and continuing support following the initial efforts. The discussion in the book includes recommendations for starting a community strategic visioning exercise.

Community Visioning Programs Norman Walzer, Gisele Hamm, 2012-01-30 Community visioning is key in helping local public officials and community leaders create a flourishing future for their cities and is essential for the effective planning and implementation of these strategies. Visioning involves collaborative goal setting to motivate actions of planners, citizens and officials in order to design and carry out a strategic planning process for the successful development of the community. The use of visioning since the 1980s has led to a wealth of information on the productivity of the paths it has taken. The contributors all with experience working in the area review the successes and failures of the strategies and look at new innovations which are pushing the frontiers of community visioning. This review of the development of visioning focuses on small and medium sized communities in North America. It aims to guide citizens, local leaders and planners on what strategies are best to help them revitalize their communities and ensure a prosperous future. **Community Economic Development**
