Ablaze Piers Paul Read,1993 On 26th April 1986 the nuclear reactor of the fourth unit of the V I Lenin power station at Chernobyl exploded It was a catastrophe of historic proportions many millions suffered and continued to suffer from the consequences **Culture's Engine** William Gosling,2020-10-17 Culture s Engine offers an insightful and penetrating analysis of the enduring relationship between technology and society William Gosling explores in absorbing historical detail how humans have experienced change through a sequence of technological revolutions each giving rise to new social organisation which in turn influences the shape and timing of the next such revolution Gosling argues that it is through this dialogue that successful technology sets the direction and pace of all cultural evolution The state of technology at any time is the major influence on the world and not just the material world This book then is not a history of technology still less of science It fundamentally questions how technology and social forces interact leading to these successive revolutions and their outcomes
