Lisa B. Cleaveland, 2016 My hope is that *More About the Authors* will help you see how shifting your thinking about mentors can make such a difference in your teaching Lisa Cleaveland This is not your typical book on mentor texts Lisa Cleaveland will show you why in her classroom authors and illustrators do the mentoring not their texts While this may seem like mere semantics it's actually a singularly powerful instructional shift Books don't make themselves writes Lisa authors and illustrators do and my students know this because they make books too About the Authors introduced tens of thousands of teachers to Lisa's primary writing workshop Now she shares what she considers the most crucial aspect of her teaching When authors and illustrators are mentors you teach students more about how to learn from their mentors than what to learn With Lisa you'll engage children by helping them discover mentor authors connect writers to the curriculum as they notice and name the moves their mentors make plan powerful units of study around mentor authors position students to mentor one another Along the way Lisa illustrates the effectiveness of this approach with full color examples of students work as well as transcripts of a question and answer session between her writers and famed children's author and illustrator Marla Frazee You'll see firsthand how closely examining a mentor's work can lead little ones to big insights about writing What I have realized writes Lisa Cleaveland is that it's all about finding mentors for writing and illustrating Find out just how powerful this slight shift in thinking can be as you find out *More About the Authors* **Teaching the Best Practice Way** Harvey Daniels, Marilyn Bizar, 2005 Everyone talks about best practice teaching but what does it actually look like in the classroom How do working teachers translate complex curriculum standards into simple workable classroom structures that embody exemplary instruction and still let kids find joy in learning In *Teaching the Best Practice Way* Harvey Daniels and Marilyn Bizar present seven basic teaching structures that make classrooms more active experiential collaborative democratic and cognitive while simultaneously meeting best practice standards across subject areas and throughout the grades Each section begins with an essay outlining one key method providing its historical background and research results and then describing the structure's vital features Next several teachers representing different grade levels and school communities explain how

they adopted the basic model adapted it to their students needs and made it their own Fully updating and expanding Methods that Matter Stenhouse 1998 Teaching the Best Practice Way adds the stories of twenty more celebrated teachers including James Beane Donna Ogle Franki Sibberson and others from around the country A brand new chapter focuses on reading as thinking detailing the ways teachers can nurture strategic readers readers who not only deeply understand the printed materials they encounter in school but who also bring these cognitive strategies to their reading of film art music and their experience of the world The book also shares new research studies that validate the principles and activities of best practice teaching along with lists of recommended materials that support each of the seven methods Unique in the field Teaching the Best Practice Way speaks to all teachers K 12 with stories examples and practical classroom materials for the teachers of all children This is the book for teachers schools and districts that believe the big ideas about teaching really do cross all grade levels and subject areas Education professors will also find this an ideal resource for use in methods courses

The Creative Writing Workshop in the 21st Century Adrian Markle, Marshall Moore, Sam Meekings, 2026-02-19 A critical interrogation of the creative writing workshop model this collection of essays provides practical suggestions for contemporary approaches to this contentious method and how it might be reimagined Since the inception of the Iowa Writers Workshop in 1936 the workshop model pioneered there has become the bedrock of creative writing instruction around the world with much existing scholarship on the subject rightly focusing on matters of inclusivity and social justice or dismissing the workshop altogether With contributions from senior scholars in the field of creative writing pedagogy and authors ranging from the US Australia and the UK to China The Creative Writing Workshop in the 21st Century offers specific actionable recommendations for ways the model can be reinvigorated Covering topics such as module design diversity and inclusion facilitation and teaching style assessments internationality and the integration of modern technology each chapter surveys perspectives on the workshop and provides concrete strategies to help instructors and workshop facilitators update and bolster their pedagogical practice
