

Dr. Alfred Tomatis developed the Tomatis® Method in the early 1950s. Dr. Tomatis was a French physician and an Ear, Nose, and Throat (ENT) specialist. He managed an acoustics lab of aeronautical factories as well as a private clinic.

These three laws are known as the **"Tomatis® Effect."**

1 "The voice can only reproduce what the ear can hear."

2 "If the sounds can be restored to the ear, the voice will immediately and unconsciously restore the missing sounds."

3 "If the ear is conditioned sufficiently with one's own voice with good quality, the changes will be maintained or lasting effect."

Journal of Singing, 2008 **Awakening Ashley** Sharon Ruben, 2010-11-01. At eighteen months, Ashley Ruben still didn't talk. She wouldn't respond when her name was called; she didn't appear to hear either. She fixated on tiny pieces of dirt and ate only crunchy foods. She was enveloped in a thick fog impenetrable by everyone except Barney the Dinosaur. She worked puzzles like a kindergartener and was computer savvy before she was two years old. Her mother's late-night searches on the Internet hinted at a reason for her lack of engagement with the outside world. And then a developmental specialist confirmed it: autism, a diagnosis that shook the foundation of a family and shattered a mother's world. Ashley could hear but she couldn't listen. In order to address that, a therapy retraining her ears to perceive sound better took her back to the time in the womb where listening begins. With the help of specialized recordings of Mozart's music, Ashley gradually awakened. Her brain's desire to communicate was kindled, fostering a connection with her body, her family, and the world around her. Ashley had recovered, developing the ability to talk, to listen, to communicate, to become an engaging child. But how could Sharon Ruben, a clinical researcher in her own right, convince the skeptics without clinical trial data to prove the effectiveness of this therapy? She didn't need data. She had Ashley: all the proof she needed. *Listen Up*. This remarkable story is for every person with a child waiting to be awakened to language and communication. Don Campbell, Author of *The Mozart Effect* and *The Mozart Effect for Children*. *Perspectives on Listening* Andrew D. Wolvin, Carolyn Gwynn Coakley, 1993-07. This book provides listening researchers, educators, and practitioners with an analysis of listening behavior from current perspectives developed by scholars concerned with the way humans process oral messages. The chapters offer a useful base for applying what the authors know about the complexities of listening to improving listening skills in personal relationships, academic work, and social settings. Contributors from communication, education, psychology, reading, audiology, and learning skills fields offer their perspectives on how we can understand listening, extending our present theoretical base into exciting new dimensions. **Introduction to the Musical Brain** Don G. Campbell, 1983. This book explores significant findings in brain research with practical application in game activities for the classroom, the therapist, and musicians. Easily adaptable to different age groups, the games activate both hemispheres and open learning receptivity. *American Journal of Acupuncture*, 1997 **Power of Five** Harold H. Bloomfield, Robert K. Cooper, 1996-11. This pioneering program allows health-conscious readers to select from a unique and comprehensive collection of ultraspecific, highly practical 5-second to 5-minute guidelines to ignite energy, stop aging, burn off body fat, and
