Business Environment and Business Ethics Karen Paul,1987 *Business Ethics* W. Michael Hoffman,Jennifer Mills Moore,1990 Women's Studies

and Business Ethics Andrea Larson, R. Edward Freeman, 1997 This latest book in the Ruffin Series in Business Ethics is the first work to analyze the significance of gender in the ethical management of business organizations. Scholars from the fields of business ethics and women's studies come together in this book to offer fresh new perspectives on business ethics. The contributors examine the value of feminist theory and scholarship for business ethics and from this examination four overarching themes emerge. The first theme is that corporations are socially constructed organizations that assume in their practice and ideology that men are the standard of measurement. Secondly, this work highlights the power of feminist critiques to bring gender into focus as a central organizing principle of economic life. The third theme explores the existence of frames, unexamined habits of mind that are taken for granted and prevent alternative ways of thinking, especially about the role of women at the periphery of organizations. The fourth theme is that business ethics itself has been feminized in its subordinate position relative to the dominant fields in the hierarchy of business management, such as finance and strategy. *Women's Studies and Business Ethics* brings together some of the most important thinkers on organizations and gender issues today. The confluence of experts in these hitherto disparate fields and the rich and lively dialogue it produces results in a book that will be fascinating reading for scholars, students, and professionals involved in all aspects of business and management.

Readings in Business Ethics and Social Responsibility William A. Wines, 1999

Managing for Responsibility Radha R. Sharma, Merrill Csuri, Kemi Ogunyemi, 2017-02-08 The cascading effects of globalization in the form of changing business environment, economic uncertainties, and economic meltdown have brought about a plethora of unprecedented challenges for industry and organizations across the globe in recent years. Management education, which prepares human capital for industry, is expected to address these challenges along with others such as intensifying competition, advancing technology, increasing workforce diversity, and accelerating complexity. Yet current management education is largely based on traditional capitalism where the focus tends toward profits and competitiveness rather than toward a balance among profitability, responsibility, social accountability, and sustainability. Consequently, management education in general and MBA education in particular need to adopt a paradigm shift in order to be more responsible and sustainable. The book contains contributions on the core management topics covered in general management, organizational behavior, ethics, and social responsibility, with a focus on responsible management. Its chapters come from many authors in PRME schools from eight countries. Hence, it is expected to be useful to all the B schools across geographies that are interested in embedding responsibility in their management curriculum and teaching methodology.

Business Ethics Milton Snoeyenbos, Robert F. Almeder, James M. Humber, 1992 Fully updated and revised, this contemporary classic discusses the moral dilemmas of corporate America: conflicts of interest, corporate takeovers, payoffs, trade secrets, drug testing, insider trading, product safety, business and the environment, privacy, whistleblowing, and more. Each section contains a case study for discussion and corporate policy statements.
