Buddhist and Freudian Psychology M. W. De Silva, 1975-05 **Freud and the Buddha** Axel Hoffer, 2018-05-15 This book investigates what psychoanalysis and Buddhism can learn from each other and offers chapters by a Buddhist scholar a psychiatrist author and a number of leading psychoanalysts It begins with a discussion of the basic understanding of both psychoanalysis and Buddhism viewed not as a religion but as a psychology and a philosophy with ethical principles The focus of the book rests on the commonality between the psychoanalyst's neutrality as he listens to his freely associating patient and the Buddhist monk's non judgmental attention to his mind The psychoanalytic concepts of free association the unconscious transference and countertransference are compared to the implications of the Buddhist principles of impermanence non clinging non attachment the hard to grasp concept of the not self and the practice of meditation The differences between the role of the analyst and that of the Buddhist teacher of meditation are explored and the important difference between the analyst's emphasis on insight and thinking is compared to the Buddhist attention to awareness and experience

Cetana and the Dynamics of Volition in Theravada Buddhism Nalini Devdas, 2008-01-01 What do the scriptures of Theravada Buddhism have to say about the most basic psychological processes through which alternatives are assessed purposes are developed and goal oriented acts are initiated How can Theravada make volitional endeavour central to Buddhist practice while denying the existence of a self who wills How can the text emphasize ethical striving and yet uphold the principle that all physical and mental acts arise through causes and conditions This book adds another perspective to Theravada scholarship by exploring various subtle Pali terms that seek to display the nuances of human motivation Cetana is shown to be the purposive impetus that links ethically good and bad attitudes of mind with corresponding acts of body speech and mind The argument is made that Theravada does not posit a controlling will but seek to establish the possibility of changing attitudes purposes and acts through holistic methods of training Theravada maintains that changes in attitude are possible because the mind has the capacity to observe its own processes of conditioning and is able to greatly diversify its responses to its own concepts and to factors in its environment

Mixing Minds Pilar Jennings, 2010-12-15 We cannot find ourselves or be ourselves alone from *Mixing Minds* *Mixing Minds* explores the interpersonal relationships between psychoanalysts and their patients and Buddhist teachers and their students Through the author's own personal journey in both traditions she sheds light on how these contrasting approaches to wellness affect our most intimate relationships These dynamic relationships provide us with keen insight into the emotional ups and downs of our lives from fear and anxiety to love compassion and equanimity *Mixing Minds* delves into the most intimate of relationships and shows us how these relationships are the key to the realization of our true selves The Authority of Experience John Pickering, 2013-12-02 This collection of writings presents contemporary views on the integration of Buddhism in the West Over the past few decades Buddhism has deepened its presence in the West and as a

result teachings and practices are becoming integrated with those of Western psychology in a more productive way The decline of mechanism and positivism offers new opportunities to bring together Western Buddhist views of the mind and its relationship to its surroundings Written by psychologists and scholars the essays discuss many of the difficult questions raised by Buddhism s increased presence In particular the issue of the balance between authenticity and accessibility is examined Buddhist traditions are often perceived as inaccessible and too firmly fixed to a cultural framework with some people especially women left feeling alienated and undervalued However by responding to this by attempting to synthesise Buddhism with the values of contemporary culture can lead to doubts about authenticity and dilution Examining these issues and many more the contributors seek to bring Buddhism into a realistic and informed relationship with contemporary Western thought

Absorption Johannes Bronkhorst, 2012 This book argues for the central role played by absorption in the functioning of the human mind The importance of absorption makes itself felt in different ways the two studies combined in this book concentrate on two of them The first study argues that largely as a result of language acquisition humans have two levels of cognition which in normal circumstances are simultaneously active Mental absorption is a or the means to circumvent some perhaps all of the associations that characterize one of these two levels resulting in what is sometimes referred to as mystical experience but which is not confined to mysticism and plays a role in various religious phenomena and elsewhere The second study takes as point of departure some puzzling statements in the early Buddhist canon that raises serious questions of a psychological nature An essential element in the psychological theory proposed is the observation that mental absorption is a source of pleasure Since the human mind is in large part guided by pleasure which it seeks to repeat states of absorption leave memory traces that subsequently direct the mind However these memory traces do not recall the states of absorption themselves but rather the objects or circumstances that accompanied them The resulting activity of the mind differs in this way from person to person and can pursue wildly diverging goals

Moon Raul Moncayo,2018-05-08 Within the context of a careful review of the psychology of religion and prior non Lacanian literature on the subject Raul Moncayo builds a bridge between Lacanian psychoanalysis and Zen Buddhism that steers clear of reducing one to the other or creating a simplistic synthesis between the two Instead by making a purposeful One mistake of unknown knowing this book remains consistent with the analytic unconscious and continues in the splendid tradition of Bodhidharma who did not know Who he was and told Emperor Wu that there was no merit in building temples for Buddhism Both traditions converge on the teaching that true subject is no ego or on the realisation that a new subject requires the symbolic death or deconstruction of imaginary ego identifications Although Lacanian psychoanalysis is known for its focus on language and Zen is considered a form of transmission outside the scriptures Zen is not without words while Lacanian psychoanalysis stresses the senseless letter of the Real or of a jouissance written on and with the body
