The Quality of Life in Latin American Cities Eduardo Lora, Andrew Powell, Bernard M.S. van Praag, Pablo Sanguinetti, 2010-05-04 A growing number of cities around the world have established systems for monitoring the quality of urban life Many of those systems combine objective information with subjective opinions and cover a wide variety of topics This book assesses a method that takes advantage of both types of information and offers criteria to identify and rank the issues of potential importance for urban dwellers This method which combines the so called hedonic price and life satisfaction approaches to value public goods was tested in pilot studies in six Latin American cities Bogot Buenos Aires Lima Medell n Montevideo and San Jos of Costa Rica It provides valuable insights to address key questions such as Which urban problems have the greatest impact on people's opinions of city management and the most widespread effects on their lives Do gaps between perception and reality vary from one area of the city to another especially between high and low income neighborhoods Where can homebuilders most feasibly seek solutions to problems such as inadequate road infrastructure a lack of recreational areas or poor safety conditions Which problems should government authorities address first in light of their impact on the well being of various groups of individuals and given private actors abilities to respond Which homeowners benefit the most from public infrastructure or services When can or should property taxes be used to finance the provision of certain services or the solution of certain problems The Quality of Life in Latin American Cities Markets and Perception proposes a monitoring system that is easy to operate and that entails reasonable costs but also has a solid conceptual basis Long the ideal of many scholars and practitioners such a system may soon become a reality and have the potential to make a significant contribution to the decision making processes in any city concerned with the well being of its

residents [Sound, Image, and National Imaginary in the Construction of Latin/o American Identities](#) Héctor Fernández L'Hoeste, Pablo Vila, 2017-12-26 [Sound Image and National Imaginary in the Construction of Latin o American Identities](#) addresses a gap in the many narratives discussing the cultural histories of Latin American nations particularly in terms of the birth configuration and perpetuation of national identities It argues that these processes were not as gradual or constrained as traditionally conceived The actual circumstances dictating the adoption of particular technologies for the representation of national ideas shifted and varied according to many factors including local circumstances political singularities economic disparities and highly individualized cultural transitions This book proposes a model of chronology that is valid not only for nations that underwent strong processes of nationalism during the early or mid twentieth century but also for those that experienced highly idiosyncratic cultural economic and political development into the early twenty first century

Social Capital in Developing Democracies Leslie E. Anderson, 2010-03-08 Drawing on extensive field work in Nicaragua and Argentina as well as public opinion and elite data Leslie E Anderson s [Social Capital in Developing Democracies](#) explores the contribution of social capital to the process of democratization and the limits of that contribution Anderson finds that in Nicaragua strong positive bridging social capital has enhanced democratization while in Argentina the legacy of Peronism has created bonding and non democratic social capital that perpetually undermines the development of democracy Faced with the reality of an anti democratic form of social capital Anderson suggests that Argentine democracy is developing on the basis of an alternative resource institutional capital Anderson concludes that social capital can and does enhance democracy under historical conditions that have created horizontal ties among citizens but that social capital can also undermine democratization where historical conditions have created vertical ties with leaders and suspicion or non cooperation among citizens
