

"On this leaf," Jerry said.
Millie looked.

There was a little bunch of eggs
on the leaf.
They were gold and green.

"Are they cricket eggs?" asked Annie.
"I don't know," said Millie.

"But I have an insect book inside.
Follow me."
Everybody followed Millie inside.

She found the insect book.

She looked up crickets.

"It says these crickets
lay their eggs in the ground,"
she said.

"Then they are not cricket eggs,
because they are on a leaf,"
said Matthew.

"I wonder how they got into the tank,"
said Millie.

"You didn't have any other insects
in there, did you, Greg?"

"No," said Greg, "only a cricket."

Reproductive Strategies in Insects Omkar, Geetanjali Mishra, 2022-02-15

Reproduction is one of the most inherent tasks that all living organisms are actively involved in. It forms the backbone of their existence with all evolutionary energies directed over billion years of creation into maximizing reproductive effort. For so simple and directed a need such as maximizing reproduction it is interesting to see how much diversity and complexity exists in this task. Each organism despite having the same end goal employs different strategies. The complexities, intricacies and strategies of successful reproduction while being extremely fascinating are equally befuddling.

Reproductive Strategies in Insects provides an expansive critical look at the reproductive strategies of the most diverse group of animals, the insects. Insects which inhabit myriad niches in all ecosystems except the oceans show the most diverse reproductive strategies ranging from simplest to most complex. Reproductive strategies viz search for mates, number of mates, display of mate quality, assessment of mate quality, acceptance of mate, rejection of mates, forced copulations, the fight for paternity pre and post copula, the modulation of paternity, ovipositional strategies and parental care are described in detail in this book. Also each strategy is analyzed in relation to its morphological, physiological, ethological, ecological and evolutionary aspects.

Features: Covers a wide variety of reproductive strategies. A detailed step by step description of reproductive strategies. Discusses morphological, physiological, ethological, ecological and evolutionary aspects. Modulation of these strategies and responsible modulatory factors are also discussed. Well illustrated. Recent research results and probable future research directions. This is a niche reference book for ethologists, biologists studying behavioural evolution and entomologists. It may also be used as a textbook for a graduate level course in behaviour.

Chemoecology of Insect Eggs and Egg Deposition Monika Hilker, Torsten Meiners, 2008-04-15 This is the first book focusing on the chemoecology of insect eggs and egg deposition. It covers a wide range of different issues including herbivorous and carnivorous insects, social insects and those of medical and veterinary importance. The knowledge compiled in this book may promote future studies on evolutionary aspects on insect reproductive behaviour as well as on controlling insect pests by targeting the egg stage.
