BODY BY FISHER
Distinctively
STYLED
OUTSIDE

THE 1949 BUICKS represent the advanced styling motorists have learned to expect in new models of Buick with Body by Fisher. The customary distinction of these brilliant new cars is instant eye-appeal—an important sales asset when compared with the impact of radical new departures on the motor car buyer.

Body by Fisher accents the feel of smooth, surging power and flowing speed that is the design motif of the new Buicks. Simplicity of line and contour have been handled with consummate skill to give the effect of dynamic swiftness, while masterful handling of detail avoids possible tendencies toward monotony. Furthermore, this sleek styling has been attained in a Body by Fisher that is bigger and roomier than ever. In the 1949 models, Buick once again sets the standard for modern automobile design.

Smooth flowing lines, starting with the front fender, follow through the full sweep of this fleet looking Buick, and the subtle suggestion of rear fenders provides interesting relief. The roll of the lower body, curving underneath, gives a finished, rounded off appearance at the bottom.

The arc of the large curving windshield permits a new

and interesting roof line in front, and the expansive rear window neatly balances the profile of this stylish Body by Fisher. The squared lower corners of windows and windshield give a fresh touch of smartness and, of course, contribute to the expansion of vision for both driver and passengers which is an important feature of the new Buicks. The slender, gleaming chrome reveal moldings, framing the windows and windshield, are appropriate and refined.

Combining utility with beauty, traditional in Body by Fisher, the baggage compartment with its extra wide lid is designed for great capacity and is blended smoothly with the long flowing lines of the car.

Fine details, such as chrome protective fender shields, exterior hardware, and even windshield wiper mounts are tailored into the body design.
