The Social and Economic Importance of the Co-operative Sector in Saskatchewan Lou Hammond Ketilson, Saskatchewan. Saskatchewan Economic and Co-operative Development, 1998 This report on Saskatchewan co-operatives begins with an examination of the roles that these organizations play in the province's communities. The theoretical base of the analysis is a conceptual model of co-operatives and their impact on communities developed through past research and described in appendix B. The analysis in this section is based on interviews with community and co-operative leaders in 11 different centres in the province chosen to provide a broad overview of the southern half of the province and to obtain samples reflecting different climatic conditions, resource bases and population mix. Responses to the interviews are organized by geographical region and are presented in the fourth section entitled Community Profiles. The second section conceptualizes the social and economic impact of co-operatives in building and sustaining communities. The third section is a sectoral analysis of Saskatchewan co-operatives covering such matters as numbers of organizations and their members, employees, investment assets and liabilities, revenues and member equity. Sectors covered include agricultural, resource, community development, child care, retail, wholesale, financial and community services. The final section presents results of a survey conducted to identify ways in which involvement with a co-operative might be related to current and past involvement in community leadership. Appendices include information on survey methodology and a list of questions for use in community interviews.
