Building A Strategic Air Force:

Strategic Air Warfare Richard H. Kohn, Joseph P. Harahan, 1988 The ability of the American air forces to wage war independently and to carry the battle to the enemy's heartland has played a critical role in American air doctrine and military strategy since the 1930s Generals LeMay Johnson Burchinal and Catton explain their roles in flying and commanding bombing missions and campaigns during World War II in creating the atomic force in the immediate postwar years and in building the Strategic Air Command in the 1950s The Cuban Missile Crisis and the Vietnam War are also discussed

Building a Strategic Air Force Walton S. Moody, 1996 *Building a Strategic Air Force* Walton S. Moody, 2019 From the 50s to the 80s the Strategic Air Command was the keystone of the American nuclear deterrent and its primary arm for waging nuclear war This is the official US Air Force history of the SAC covering the years from the end of World War Two to the mid 1950s when the Cold War reached its peak and SAC grew from a tiny force with just a few nuclear weapons into the most powerful military organization in the world **Building a Strategic Air Force** LIGHTNING SOURCE INC, Walton S. of the strategy of atomic deterrence with the actual composition and nature of that force The importance of the Air Force as an institution in American life and the role of the strategic force in that institution would seem to establish the importance of the subject American air leaders believed that the consequences of the air arm s not being ready to carry out such an offensive through failure to plan or for any other reason could be grave These then were disturbing times In this connection there are many in the Soviet Union today who consider the practice of falsifying the historical record for current political purposes to have been one of the most corrupting factors in the life of that country Part I Postwar Reorganization 1945 1947 I Air Power and the Airmen 1945 Air Power and Strategy Building a Strategic Air Force 1917 1945 The Postwar Challenge II The Case for a Postwar Air Force A New Strategic World Demobilization and Occupation Planning for Strategic Air Power III The Beginnings of a Strategic Air Force Air Power Deferred The Strategic Force and Demobilization The Strategic Force and the Fifty five Group Program Modernizing the Bomber Force IV The Uncertain Phase Understanding the Bomb Command of Strategic Forces Planning for Atomic War Part II Austerity and Strategic Air Power 1947 1950 V Decision for a Strategic Air Force Making the Case for Air Power Finletter and Brewster A Program for Atomic Readiness JCS 1745 5 Aircraft for the Strategic Offensive VI The Year of Crisis Toward a Crisis Budget Roles Missions and Budgets The Berlin Crisis Containment Deterrence and NSC 20 4 The Hollow Threat and LeMay VII The Priority Mission Aircraft for Deterrence Return to Austerity Modernization and Standardization VIII Challenges to Strategy The Challenge at Home Facing the Challenge The External Challenge The Soviet Bomb The Strategic Force at the Ready SAC in 1950 Part III Expansion of the Strategic Force 1950 1953 IX Limited War Atomic Plenty and Rearmament Deterrence at Risk Rearmament Begins The Role of Nuclear Weapons Expanding the Strategic Force An Investment in Air Power X Never Before Surpassed Medium Bombers in Korea Expansion and Professionalism Planes and Weapons 1950 1953 Basing for a Global Strike Force From New Phase to New Look

Building a Strategic Air Force Office of Air Force History, U.S. Air Force, 2015-01-31 From 1946 to 1991 the Strategic Air Command SAC operated the intercontinental and nuclear strike forces of the United States Air Force During much of this period SAC was the premier operational command of the service The rising tensions of the Cold War with Soviet directed world communism gave the command a crucial role as the main force deterring potential aggression against the United States and its allies Even after the emergence of airborne strategic nuclear forces in the late 1950s SAC s status as an Air Force major command and the Joint Chiefs of Staff specified command gave it the pivotal role in national strategy This volume deals with the early years of the Air Force s effort to build and maintain a strategic striking force from 1945 through 1953 It discusses the period of reorganization in national defense in the years after the end of the Second World War as the Army Air Forces dealt with questions of structure doctrine strategy atomic weapons and technology Crucial decisions were made at the end of 1947 and the beginning of 1948 but fiscal austerity limited the new United States Air Force in implementing those decisions Despite this General Curtis E LeMay the SAC Commander found means and developed

methods to ensure a high state of combat readiness The war in Korea triggered an expansion of the armed forces including SAC that culminated in the New Look of the Eisenhower administration The New Look emphasized nuclear air power as the foundation of a national strategy of containment and deterrence Walton S Moody s analytical work discusses the challenges facing Air Force leaders in this time of stringent budgets interservice disputes and technological change In particular it examines the role of that leadership in fostering the development of an effective war ready yet peace keeping organization The issues it raises are still relevant today in a time when the distinction between strategic and tactical air power is less clear cut and when the armed services of the United States are redefining roles for themselves in the Post Cold War era

Crane,2000 The Korean War was the first armed engagement for the newly formed U S Air Force but far from the type of conflict it expected or wanted to fight As the first air war of the nuclear age it posed a major challenge to the service to define and successfully carry out its mission by stretching the constraints of limited war while avoiding the excesses of total war Conrad Crane analyzes both the successes

and failures of the air force in Korea offering a balanced treatment of how the air war in Korea actually unfolded He examines the Air Force's contention that it could play a decisive role in a non nuclear regional war but shows that the fledgling service was held to unrealistically high expectations based on airpower's performance in World War II despite being constrained by the limited nature of the Korean conflict Crane exposes the tensions and rivalries between services showing that emphasis on strategic bombing came at the expense of air support for ground troops and he tells how interactions between army and air force generals shaped the air force's mission and strategy He also addresses misunderstandings about plans to use nuclear biological and chemical weapons in the war and includes new information from pilot correspondence about the informal policy of hot pursuit over the Yalu that existed at the end of the war The book considers not only the actual air effort in Korea but also its ramifications The air force doubled in size during the war and used that growth to secure its position in the defense establishment but it wagered its future on its ability to deliver nuclear weapons in a high intensity conflict a position that left it unprepared to fight the next limited war in Vietnam As America observes the fiftieth anniversary of its initial engagement in Korea Crane's book is an important reminder of the lessons learned there And as airpower continues to be a cornerstone of American defense this examination of its uses in Korea provides new insights about the air force's capabilities and limitations

US Presidents and the Militarization of Space, 1946-1967 Sean N. Kalic, 2012-05-02 In the clash of ideologies represented by the Cold War even the heavens were not immune to militarization Satellites and space programs became critical elements among the national security objectives of both the United States and the Soviet Union According to US Presidents and the Militarization of Space 1946-1967 three American presidents in succession shared a fundamental objective of preserving space as a weapons free frontier for the benefit of all humanity Between 1953 and 1967 Presidents Eisenhower Kennedy and Johnson all saw nonaggressive military satellite development as well as the civilian space program as means to favorably shape the international community's opinion of the scientific technological and military capabilities of the United States Sean N Kalic's reinterpretation of the development of US space policy based on documents declassified in the past decade demonstrates that a single vision for the appropriate uses of space characterized American strategies across parties and administrations during this period Significantly Kalic's findings contradict the popular opinion that the United States sought to weaponize space and calls into question the traditional interpretation of the space race as a simple action reaction paradigm Indeed beyond serving as a symbol and ambassador of US technological capability its satellite program provided the United States with advanced nonaggressive military intelligence gathering platforms that proved critical in assessing the strategic nuclear balance between the United States and the Soviet Union It also aided the three administrations in
