Building an Austrian Nation William Theodore Bluhm, 1973 **Building an Austrian Nation** William T. Bluhm, 1973

Building an Austrian Nation; the Political Integration of a Western State, by William T. Bluhm William Theodore Bluhm, 1973 Crafting State-Nations Alfred Stepan, Juan J. Linz, Yogendra Yadav, 2011-03-31 Political wisdom holds that the political boundaries of a state necessarily coincide with a nation's perceived cultural boundaries. Today the sociocultural diversity of many polities renders this understanding obsolete. This volume provides the framework for the state nation, a new paradigm that addresses the need within democratic nations to accommodate distinct ethnic and cultural groups within a country while maintaining national political coherence. First introduced briefly in 1996 by Alfred Stepan and Juan J. Linz, the state nation is a country with significant multicultural even multinational components that engenders strong identification and loyalty from its citizens. Here Indian political scholar Yogendra Yadav joins Stepan and Linz to outline and develop the concept further. The core of the book documents how state nation policies have helped craft multiple but complementary identities in India in contrast to nation state policies in Sri Lanka which contributed to polarized and warring identities. The authors support their argument with the results of some of the largest and most original surveys ever designed and employed for comparative political research. They include a chapter discussing why the U.S. constitutional model often seen as the preferred template for all the world's federations would have been particularly inappropriate for crafting democracy in politically robust multinational countries such as India or Spain. To expand the repertoire of how even unitary states can respond to territorially concentrated minorities with some secessionist desires, the authors develop a revised theory of federacy and show how such a formula helped craft the recent peace agreement in Aceh, Indonesia. Empirically thorough and conceptually clear, *Crafting State Nations* will have a substantial impact on the study of comparative political institutions and the conception and understanding of nationalism and democracy. *Austrian Information*, 1981 **The Habsburg Legacy** Ritchie Robertson, Edward Timms, 1994. With the collapse of Communism in Eastern Europe and the break up of the Soviet Union, nationalism and its effects are once more at the forefront of attention. However, to understand more fully what is happening now, it is valuable to look back into the past and examine the construction and collapse of the multinational Habsburg Empire. After examining how the Holy Roman Empire became the Austrian Empire at the beginning of the nineteenth century, this collection of essays charts the subsequent growth of distinctive regional identities in Hungary, Galicia, Trieste, and Croatia before looking at the official attempts to define ethnic identity and what harm resulted from their good intentions. Differing constructions of Austrian identity among Jewish novelists, women writers, and art historians, besides the literary works of Hofmannsthal and Musil, are then analysed, as are the attempts to devise a new Austrian identity under the semi-fascist rule of the 1930s and the early years of the post-war Second Republic. Concluding with a general analysis contrasting the gradual integration of nations in present-day western Europe with the dissolution of multinational states in

Remembering and Forgetting Nazism Peter Utgaard,2003-11-01 The Myth of Austrian victimization at the hands of both Nazi Germany and the Allies became the unifying theme of Austrian official memory and a key component of national identity as a new Austria emerged from the ruins In the 1980s Austria s myth of victimization came under intense scrutiny in the wake of the Waldheim scandal that marked the beginning of its erosion The fiftieth anniversary of the Anshlu in 1988 accelerated this process and resulted in a collective shift away from the victim myth Important themes examined include the rebirth of Austria the Anshlu the war and the Holocaust the Austrian resistance and the Allied occupation The fragmentation of Austrian official memory since the late 1980s coincided with the dismantling of the Conservative and Social Democratic coalition which had defined Austrian politics in the postwar period Through the eyes of the Austrian school system this book examines how postwar Austria came to terms with the Second World War

Democracy in Plural Societies Arend Lijphart,1977-01-01 While it may be difficult to achieve and maintain stable democratic governments in countries with deep religious ideological linguistic cultural or ethnic cleavages Lijphart argues that it is not at all impossible Through the analysis of political systems in six continents he demonstrates that what he calls consociational democracy can be successful in severely divided or plural societies Here once again Arend Lijphart is directing our attention to matters which will surely engage much of the attention of students of comparative politics in the next decade G Bingham Powell Jr American Political Science Review A study which can speak to such a wide audience in political science deserves a warm welcome from the profession Government and Opposition A copybook example of the comparative method of political analysis as well as indispensable reading for all who have an interest in the nature and prospects of representative democracy whether in Europe or beyond The Times Higher Education Supplement This well written work containing a wealth of information on politics of many diverse nations is highly recommended Library Journal
