

# Building Architectural Models

**Wolfgang Knoll, Martin Hechinger**

## **Building Architectural Models:**

**Model Making for Architects** Matt Driscoll, 2013-06-30 Model making is a beautiful and skilful craft and architectural model making is a vital part of the building process The architectural model is often the first time that a building is visualized in 3D It can capture the excitement of the architect's vision but can also reveal unforeseen difficulties Model Making for Architects explains the role of the model within the architectural and planning process It advises on the many ways of representing a building and the many techniques of making a model With practical instruction throughout it is an invaluable tool both for the model maker and for the architect seeking to commission a model of their building With contributions from leading practitioners case studies on multi million pound projects and step by step exercises this new book provides a unique insight into the process of architectural model making and looks at the new technology and opportunities available to the model maker What and who is an architectural model for What type of model should be used and when What scale is most appropriate These questions are answered in this new book which provides a unique insight into the process of architectural model making Illustrated with examples of top models of multi million pound projects Will be invaluable for architectural model makers architects surveyors and interior designers Superbly illustrated with 227 colour photographs Matt Driscoll is the founding director of Base Models renowned for creating beautiful yet practical architectural models

**Architectural Models** Wolfgang Knoll, Martin Hechinger, 2007-12-15 Architects models serve as bridge between an idea and its realization Models are one of the three means by which an architect invents and develops his design sketch model computer model No other representational form is as effective in enabling the viewer to perceive the spaces shapes surfaces and textures created by the architect's design it is therefore a prerequisite in the design process Architectural Models provides clear and comprehensible instruction explaining how design ideas can be skillfully translated into models Some 200 black and white illustrations and new to this edition more than 40 extraordinary full color photographs provide a comprehensive visual explication of the text In this completely revised edition the authors convey practical basics and offer a wealth of innovative and valuable suggestions for students of architecture or graphic arts as well as for experienced architectural model makers

Architecture and Modelbuilding Alexander Schilling, 2018-09-10 Architectural models are used at various stages of a project As working models they support the design process they are made up from time to time using simple materials such as cardboard without any attempt at accuracy and continue to be adjusted and added to as the ideas and the design progress The point here is to swiftly check a design idea to allow it to be continued or dismissed Presentational models are more involved at this stage the design has been completed and the purpose of the model is to convey the ideas to the potential user in a clear and easy to understand way The book Architecture and Model Building includes outstanding examples explaining the possibilities of this medium and at the same time provides comprehensive information on materials and techniques
