Brigman, John S. Vanderoef, 1970 In selecting the material for this volume we looked for readings that would both stimulate student interest and at the same time contribute to a deeper understanding of the workings of the American political system The readings we chose were drawn

primarily from two sources from the work of recognized scholars whose research has added to the store of knowledge about the American political process and from the writings of men who have been active in that process We feel that both a scholar applying research skills to a study of the Presidency and a close presidential adviser who knows the president's problems can throw light on the nature of executive decision making The analysis of an expert on the political party system and the observations of an experienced and astute campaign worker can both be used to sharpen the student's awareness of the political process A political scientist's exploration of the complexities of federalism can have much greater meaning when supplemented by a former Governor's account of his own grapplings with federal state relationships Thus we have drawn upon diverse types of literature in order to expose the reader to the subject matter from many different angles A collection of readings is of necessity selective but this one we believe will at least be representative of the various approaches to the most significant areas to be explored in a study of American government and politics
