Building Jewish In The Roman East Paperback:

Building Jewish in the Roman East Peter Richardson, 2005-02-01 Archaeology has unearthed the glories of ancient Jewish buildings throughout the Mediterranean But what has remained shrouded is what these buildings meant Building Jewish first surveys the architecture of small rural villages in the Galilee in the early Roman period before examining the development of synagogues as Jewish associations Finally Building Jewish explores Jerusalem s flurry of building activity under Herod the Great in the first century BCE Richardson s careful work not only documents the culture that forms the background to any study of Second Temple Judaism and early Christianity but he also succeeds in demonstrating how architecture itself like a text conveys meaning and thus directly illuminates daily life and religious thought and practice in the ancient world

The Book of Jubilees Michael Segal, 2007-05-31 Almost all scholars have viewed the book of Jubilees as the work of a single author applying to the book methods of analysis determined primarily by its literary genre Rewritten Bible This study suggests a new approach in light of numerous contradictions between the rewritten stories on the one hand and the juxtaposed legal passages and chronological framework on the other It is suggested here that the editor of Jubilees adopted extant reworked sources and added his own legal and chronological framework This proposed literary critical method is highly significant for the study of the book s worldview as is demonstrated by the analysis of passages in Jubilees that relate to the origins of evil and of law in the world

The Ancient Synagogue from Its Origins to 200 C.E. Anders Runesson, Donald D. Binder, Birger Olsson, 2008 This volume gathers for the first time all of the primary source material on the early synagogues up through the Second Century C E Each entry contains bibliographic citations and interpretative comments An Introduction frames the

current state of synagogue research while extensive indices allow for easy location of specific allusions *Calendrical Variations in Second Temple Judaism* Stéphane Saulnier,2012-05-03 Starting from the seminal work of the French scholar Annie Jaubert on the date of the Last Supper the present work revisits known and identifies new calendrical issues in the literature of Second Temple Judaism The research supports the conclusion that all known calendrical traditions functioned on the tenet that orthopraxis in ancient Judaism meant close interconnection between cultic and agricultural cycles From this perspective the book removes the calendrical objection leveled at the Jaubertian theory Further the research brings new light on current debates about Qumran calendrical documents and proposes the identification of a previously unknown calendrical polemic in the Astronomical Book of Enoch concerning the synchronization of the 364DY tradition with the lunar cycle
