Building The Cold War Consensus:

Building a Cold War Consensus Gretchen Marie White,1991 *Building the Cold War Consensus* Benjamin O. Fordham,1994 **Building the Cold War Consensus** Benjamin Fordham,2010-05-25 In 1950 the U S military budget more than tripled while plans for a national health care system and other new social welfare programs disappeared from the agenda At the same time the official campaign against the influence of radicals in American life reached new heights Benjamin Fordham suggests that these domestic and foreign policy outcomes are closely related The Truman administration s efforts to fund its ambitious and expensive foreign policy required it to sacrifice much of its domestic agenda and acquiesce to conservative demands for a campaign against radicals in the labor movement and elsewhere Using a statistical analysis of the economic sources of support and opposition to the Truman Administration s foreign policy and a historical account of the crucial period between the summer of 1949 and the winter of 1951 Fordham integrates the political struggle over NSC 68 the decision to intervene in the Korean War and congressional debates over the Fair Deal McCarthyism and military spending The Truman Administration s policy was politically successful not only because it appealed to internationally oriented sectors of the U S economy but also because it was linked to domestic policies favored by domestically oriented labor sensitive sectors that would otherwise have opposed it This interpretation of Cold War foreign policy will interest political scientists and historians concerned with the origins of the Cold War American social welfare policy McCarthyism and the Korean War and the theoretical argument it advances will be of interest broadly to scholars of U S foreign policy American politics and international relations theory Benjamin O Fordham is Assistant Professor of Political Science State University of New York at Albany **NSC 68 and the Political Economy of the Early Cold War** Curt Cardwell,2011-06-13 NSC 68 and the Political Economy of the Early Cold War re examines the origins and implementation of NSC 68 the massive rearmament program that the United States embarked upon beginning in the summer of 1950 Curt Cardwell reinterprets the origins of NSC 68 to demonstrate that the aim of the program was less about containing communism than ensuring the survival of the nascent postwar global economy upon which rested postwar US prosperity The book challenges most studies on NSC 68 as a document of geostrategy and argues instead that it is more correctly understood as a document rooted in concerns for the US domestic political economy **Cold War US Foreign Policy** Steven Hurst,2019-07-31 This book provides the first comprehensive description and critique of the six most important historical interpretations of US Cold War foreign policy Traditionalism Revisionism Post Revisionism Corporatism World Systems Theory and Post Structuralism The author uses the levels of analysis approach to demonstrate how each of these perspectives can be understood as an explanatory framework combining different types of factors located at different levels of the international system This original way of explaining the work of the historians discussed helps the reader to see past the narrative and empirical elements of their writings and to grasp more clearly the underlying theoretical assumptions In

each chapter a description of the perspectives underlying theoretical framework and how it explains US foreign policy is followed by a critique of that theory and explanation A central theme developed throughout the book is the difficulty of managing the constant tension between the explanatory power of theory and the historian's desire to encompass the complex totality of historical events This critical companion can be read alongside the works of the historians themselves showing how they have sought to explain US Cold War foreign policy and the key differences between their perspectives Key Features 1st complete discussion of the 6 schools of thought in one volume Discusses current issues such as corporatism world systems theory and post structuralism in an accessible manner original use of the levels of analysis framework in studying this subject demonstrates in practical terms how each theory explains US Cold War foreign policy

A Sense of Power John A. Thompson, 2015-12-04 Why has the United States assumed so extensive and costly a role in world affairs over the last hundred years The two most common answers to this question are because it could and because it had to Neither answer will do according to this challenging re assessment of the way that America came to assume its global role The country's vast economic resources gave it the capacity to exercise great influence abroad but Americans were long reluctant to meet the costs of wielding that power Neither the country's safety from foreign attack nor its economic well being required the achievement of ambitious foreign policy objectives In *A Sense of Power* John A Thompson takes a long view of America's dramatic rise as a world power from the late nineteenth century into the post World War II era How and more importantly why has America come to play such a dominant role in world affairs There is he argues no simple answer Thompson challenges conventional explanations of America's involvement in World War I and World War II seeing neither the requirements of national security nor economic interests as determining He shows how American leaders from Wilson to Truman developed an ever more capacious understanding of the national interest and why by the 1940s most Americans came to support the price tag in blood and treasure attached to strenuous efforts to shape the world The beliefs and emotions that led them to do so reflected distinctive aspects of U S culture not least the strength of ties to Europe Consciousness of the nation's unique power fostered feelings of responsibility entitlement and aspiration among the people and leaders of the United States This original analysis challenges some widely held beliefs about the determinants of United States foreign policy and will bring new insight to contemporary debates about whether the nation should or must play so active a part in world politics

[The Cold War in Universities](#) Natalia Tsvetkova, 2021-09-27 In *Cold War in Universities* U S and Soviet Cultural Diplomacy 1945-1990 Natalia Tsvetkova recounts how the United States and the Soviet Union aspired to transform overseas academic institutions according to their political aims during the Cold War The book depicts how U S and Soviet attempts to impose certain values disciplines teaching models structures statutes and personnel at universities in divided Germany Afghanistan Ethiopia both Vietnams and Cuba as well as Guatemala were foiled by sabotage ignorance and resistance on the part of the local academic elite particularly professors Often at odds with local academic communities U S

and Soviet university policies endured unexpected frustrations as their efforts toward Americanization and Sovietization faced developmental setbacks grassroots resistance and even political fear

Innocent Weapons Margaret Peacock, 2014-08-25 In the 1950s and 1960s images of children appeared everywhere from movies to milk cartons their smiling faces used to sell everything including war In this provocative book Margaret Peacock offers an original account of how Soviet and American leaders used emotionally charged images of children in an attempt to create popular support for their policies at home and abroad Groups on either side of the Iron Curtain pushed visions of endangered abandoned and segregated children to indict the enemy's state and its policies Though the Cold War is often characterized as an ideological divide between the capitalist West and the communist East Peacock demonstrates a deep symmetry in how Soviet and American propagandists mobilized similar images to similar ends despite their differences Based on extensive research spanning fourteen archives and three countries Peacock tells a new story of the Cold War seeing the conflict not simply as a divide between East and West but as a struggle between the producers of culture and their target audiences

Total Cold War Kenneth Alan Osgood, 2006 Osgood focuses on major campaigns such as Atoms for Peace People to People and cultural exchange programs Drawing on recently declassified documents that record U.S. psychological operations in some three dozen countries he tells how U.S. propaganda agencies presented everyday life in America to the world its citizens living full happy lives in a classless society where economic bounty was shared by all Osgood

further investigates the ways in which superpower disarmament negotiations were used as propaganda maneuvers in the battle for international public opinion He also reexamines the early years of the space race focusing especially on the challenge to American propagandists posed by the Soviet launch of Sputnik

The Myth of American Diplomacy Walter L. Hixson,2008 In this major reconceptualization of the history of U S foreign policy Walter Hixson engages with the entire sweep of that history from its Puritan beginnings to the twenty first century s war on terror He contends that a mythical national identity which includes the notion of American moral superiority and the duty to protect all of humanity has had remarkable continuity through the centuries repeatedly propelling America into war against an endless series of external enemies As this myth has supported violence violence in turn has supported the myth The Myth of American Diplomacy shows the deep connections between American foreign policy and the domestic culture from which it springs Hixson investigates the national narratives that help to explain ethnic cleansing of Indians nineteenth century imperial thrusts in Mexico and the Philippines the two World Wars the Cold War the Iraq War and today s war on terror He examines the discourses within America that have continuously inspired what he calls our pathologically violent foreign policy The presumption that as an exceptionally virtuous nation the United States possesses a special right to exert power only encourages violence Hixson concludes and he suggests some fruitful ways to redirect foreign policy toward a more just and peaceful world

Peacemaking by Democracies Norrin M. Ripsman,2002 Challenging this assumption Peacemaking by Democracies breaks down the category of democracy to argue that differences in structural autonomy among democratic states have a lot to do with how foreign security policies are chosen and international negotiations are carried out The more structural autonomy the foreign security policy executive possesses the greater the policy independence from public and legislative opinion it is able to achieve
