Abandoned Generation Rethinking Higher Education:

The Abandoned Generation William H. Willimon, Thomas H. Naylor, 1995 The two Duke University educators assess the current state of American higher education and provide a strategy for change **Transforming Undergraduate Education** Donald W. Harward, 2012 Given the intensity of interest regarding the problems in higher education Harward notes how the systemic sources of those problems are infrequently addressed and even rarer is the offering of solutions or suggestions for positive actions Harward and his colleagues see the achievement of this book as doing both understanding the problems and offering solutions Literature Carl Woodring, 1999 In the tradition of Ruskin and Arnold here is a witty elegant essay on the contemporary academy by a renowned teacher scholar and former administrator Bonhoeffer Down Under Ian Packer, Gordon Preece, 2012-08-30 If Protestants had saints Dietrich Bonhoeffer martyred under Hitler on April 9 1945 just days before the Allies reached his concentration camp would be one of the first canonised Not just his unsought martyr's death but his life's movement from privilege to growing identification with the suffering his courageous return from the safety and beckoning success of the US to Germany his work with the Confessing Church and more controversially with the underground resistance in the plot to assassinate Hitler all argue his case for canonisation Bonhoeffer is among ten twentieth century martyrs above the Great West Door at Westminster Cathedral where their portraits of ten tell more about the artists and their age than the saint and theirs the movement of their lives and the movements they belonged to or founded This is certainly true of Bonhoeffer and the Church of his anguished age This collection of essays is from Down Under for with the exception of the paper by UK theologian Keith Clements are all the papers are by writers who live and work in the southern hemisphere They include former Australian Prime Minister Kevin Rudd South African theologian John de Gruchy and a number of Australian writers These include papers by historian John Moses and theologians Gordon Preece Brian Rosner Bruce Barber Max Champion and Neil Holm Kevin Rudd writes in this volume that Bonhoeffer is without doubt the man I admire most in the history of the twentieth century He was a man of faith He was a man of reason He was never a nationalist always an internationalist For tormented twenty first century humanity Bonhoeffer is still one of our best guides to that new humanity being birthed by the Spirit of Christ in the midst of those seeing from and suffering below *Spiritual Formation in Emerging Adulthood* David P. Setran, Chris A. Kiesling, 2013-08-15 The shift from adolescence to adulthood a recently identified stage of life called emerging adulthood covers an increasing span of years in today's culture roughly ages 18 30 due to later marriages and extended education During this prolonged stage of exploration and self definition many young adults drift away from the church Here two authors both veteran teachers who are experienced in young adult and campus ministry address this new and urgent field of study offering a Christian perspective on what it means to be spiritually formed into adulthood They provide a practical theology for emerging adult ministry and offer insight into the key developmental issues of this stage of life including identity intimacy and sexuality morality church involvement spiritual

formation vocation and mentoring The book bridges the gap between academic and popular literature on emerging adulthood and offers concrete ways to facilitate spiritual formation among emerging adults Higher Education in the United States James J. F. Forest, Kevin Kinser, 2002-06-21 Surveys the changing landscape of American higher education from academic freedom to virtual universities from campus crime to Pell Grants from the Student Privacy Act to student diversity In the years following World War II college and university enrollment doubled students revolted faculty unionized and community colleges evolved Tuition and technology soared as did the number of first generation minority and women students These changes radically transformed the American system of postsecondary education Today that system is in trouble Its aging professoriate prepares for retirement but low academic salaries can no longer attract the best minds to replace them A flood of corporate dollars funds commercial research but money for basic research the seedbed of American scientific preeminence has dried up Colleges and universities also face heated competition with for profit education providers for students faculty and external financial support along with the costs of providing remedial education to growing numbers of students who are unprepared for postsecondary education Higher Education in the United States provides a comprehensive analysis of these issues and others that scholars and practitioners of higher education study discuss and grapple with on a daily basis

Princeton in the Nation's Service P. C. Kemeny, 1998-10-29 This book argues against the conventional idea that Protestantism effectively ceased to play an important role in American higher education around the end of the 19th century Employing Princeton as an example the study shows that Protestantism was not abandoned but rather modified to conform to the educational values and intellectual standards of the modern university Drawing upon a wealth of neglected primary sources Kemeny sheds new light on the role of religion in higher education by examining what was happening both inside and outside the classroom and by illustrating that religious and secular commitments were not neatly divisible but rather commingled

Parental Involvement in Higher Education Katherine Lynk Wartman, Marjorie Savage, 2008-05-02 Helicopter parents have become a recent phenomenon in higher education Who are these parents and why have they landed on our college campuses This monograph examines parental involvement in higher education by looking at the history of the relationship between students and institutions and institutional responses to this phenomenon It explores alternative theoretical frameworks that highlight the benefits of strong parental relationships for today's college students paying particular attention to the variables of gender race and socioeconomic class and how they inform the student parent relationship This text concludes with implications for practice and suggestions for policy so that all parents are included in our institutional efforts not just the ones making all the noise Back cover

Universitas and Moral Excellence Ray D. Hostetter, 2007-04-18 This work was born out of a concern that the advancement of society's underlying moral strength is becoming increasingly weaker Due to this deficiency there is a call to educators particularly at the college and university levels to give careful and collective attention to the three groundings that are consonant with well functioning societies

morality rationality and personal responsibility The book discusses the universitas model the historic function of an advanced academic community as a reference for dialogue and reasoning in the pursuit of moral excellence Dr Hostetter articulates that higher educational institutions should seek to understand and restore this model with the ultimate aim of formulating a meaningful institutional worldview Denoting entirety and signifying all together universitas requires that a high measure of solidarity should be demonstrated The work outlines potential steps and essential aspects of the universitas idea that institutions might consider useful An overarching goal of universitas is examined under the rubric the judicious use of knowledge This implies the necessity that collective stands regarding key values be taken A basic premise is that colleges and universities should devote mindful attention to discerning the highest good as well as the supportive goods that are required to achieve the highest good for all Examples of possible institutionally discerned goods are reviewed in several chapters according to religious ideological and institutionally unique categories

New Challenges for Greek Letter Organizations Edward G. Whipple, 1998-04-07 Greek organizations must demonstrate their educational value if they are to survive and thrive This volume examines how contemporary Greeks are coping with the age old problems of alcohol abuse and legal liability as well as the challenges presented by an increasingly diverse campus population The contributors show how student affairs professionals can help Greek organizations achieve their potential as learning communities and play a positive role in their members cognitive and ethical development This is the 81st issue of the quarterly journal *New Directions for Student Services* For more information on the series please see the Journals and Periodicals page

Speaking of Higher Education Jason Johnson, 2008

Downsizing the U.S.A. Thomas H. Naylor, William H. Willimon, 1997 In this trenchant analysis of American society Thomas Naylor and William Willimon take an unabashed stance against the belief that bigger is better and contend that there is a price to be paid for our uncritical affirmation of bigness

With All Your Mind Michael L. Peterson, 2001 *With All Your Mind* makes a compelling case for the value of thinking deeply about education in America from a historically orthodox and broadly ecumenical Christian point of view Few people dispute that

education in America is in a state of crisis But not many have posed workable solutions to this serious problem Michael Peterson contends that thinking philosophically about education is our only hope for meaningful progress In this refreshing book he invites all who are concerned about education in America to participate in his study which analyzes representative theories and practical strategies that reveal the power of Christian ideas in this vital area Peterson addresses the most fundamental questions facing educators and society in general such as What is the purpose of education What goals do new techniques and methods serve What kind of person is our educational system supposed to produce He also explores questions of unique importance to Christians such as What is the relation between Christianity and the pursuit of intellectual excellence How can Christians bring their faith to bear on all areas of knowledge Can educated Christians significantly influence culture With *All Your Mind* examines the key assumptions and implications of influential classical and contemporary philosophies with respect to education including idealism naturalism Thomism experimentalism existentialism linguistic analysis and postmodernism Based on this analysis Peterson develops an unapologetically Christian philosophy of education in regard to curriculum design instilling ethics and values and the nature of teaching and learning Peterson further advances the merits of an ecumenical Christian philosophy of education by showing how it can be used to analyze key issues in educational theory such as the relation of general education to liberal learning the integration of faith and learning and the demand for professional and technical training From a practical standpoint Peterson s approach brings balance and common sense to issues such as the clash between public and private education the rise of multiculturalism the changing demographic and psychological profile of America s youth and the impact of computer and Internet technology With *All Your Mind* concludes with a stirring vision for education that is embedded in an all encompassing Christian view of life Using clear jargon free language Peterson teaches a good deal of basic philosophy while developing a powerful argument for the value of liberal arts education interacting with Christian faith at all levels of schooling
