Heinlein, 1954-11-01 Robert A Heinlein is widely and justly regarded as the greatest practitioner of the art of science fiction who has ever lived Here are two of his greatest short novels GULF In which the greatest superspy of them all is revealed as the leader of a league of supermen and women who can t quite decide what to do with the rest of us LOST LEGACY In which it is proved that we are all members of that league or would be if we but had eyes to see PLUS TWO GREAT STORIES Two of the Master s finest one on the nature of Being the other on what it means to be a Man

Assignment in Eternity. Four ... Science Fiction Stories Robert Anson Heinlein, 1955 **Assignment in Eternity, Etc** Robert Anson Heinlein, 1963 **Short Story Index** Dorothy Elizabeth Cook, Estelle A. Fidell, 1956 **Adult Catalog: Title** Los Angeles County Public Library, 1970 **The Publishers' Trade List Annual** , 1966 The Way to Ground Zero Martha A. Bartter, 1988-10-24 Bartter surveys 250 American science fiction stories and American SF novels with occasional overlaps of stories made into episodic novels that have some relationship often direct sometimes marginal to atomic weapons and their effects Highly recommended for popular literature collections Choice Divided into three principal parts The Way to Ground Zero begins by exploring The Way to Hiroshima Through a detailed analysis of the works included Bartter reveals the sociopolitical assumptions that authors took for granted and develops a method by which these assumptions can be disclosed She shows that encoded in these fictions we can find the patterns that led us to create and use the atomic bomb In the second section Bartter looks at the deeper assumptions on which these sociopolitical assumptions rest focusing particularly on those which perpetuate considerations of nuclear war both in science fiction and in actual policy making Finally Bartter explores alternative assumptions proposed by innovative science fiction writers Throughout an attempt is made to forge a deeper understanding of the ways in which science fiction both reflects and influences human and international relations Students of science fiction and of literature and politics will find Bartter s work enlightening provocative reading Bartter argues that a close examination of American fiction particularly science fiction can offer important new insights into the

events surrounding the bombing of Hiroshima in 1945 The use of an atomic bomb to end the war followed a scenario long established in science fiction defeating our enemy with a super weapon developed by native technological genius By examining the interrelationship between this persistent plot device and the development and use of a real super weapon Bartter sheds new light on the transactional role of literature and real life Her analysis is based on a comprehensive theory of human nature substantiated by exhaustive research in science fiction archives and libraries and covers a large number of stories both well known and relatively obscure featuring super weapons or super war and published by American authors
