Brick ,1914 *Modules on Developing Life Skills of Four to Five Year Old Children Using Digital Stories and Activities* Priscilla Angelique Pegollo, MAEd,2022-03-18 The concept of the modules is based on the author s observations in the early education system that is failing to deliver the outcomes needed to advance the young learner s social skills and development This scenario will later on affect the education opportunities in the future which will contribute to the country s economic growth Thus the successful performance in preschool needs to be supported by life skills and values which should be fostered by our education systems Teaching life skills with hands on activities is a bit behind because most of the preschool curriculum are merely focused on academics in preparation for Grade 1 The modules are designed to help teachers parents school and education in general to teach life skills through digital storytelling and facilitate hands on and digital activities in virtual learning The format of the modules activities is anchored on the play based and learner centered teaching method to immerse the preschool students in fun meaningful learning experiences After the discussion students will perform the oral activity to practice how they express their thoughts and feelings or insights about the lesson The hands on activity and games will be the students application of the lesson they learned
