Levine,2003 *Building Community in Schools* Thomas J. Sergiovanni,1999-09-21 Sergiovanni documents cases of schools that have successfully reinvented themselves in order to establish a sense of community as the foundation for all curriculum and instruction decisions Teachers administrators teacher educators and communities seeking advice and motivation for restructuring schools for the 21st century would be well advised to consult this work Choice Provides the practitioner with both a theoretical blueprint with which to build learning communities and a rich supply of benchmark illustrations to use as prototypes thought provoking and challenging NASSP Bulletin Both in and out of schools people are experiencing a loss of community In this book Thomas J Sergiovanni explains why a sense of community is so vital to the success of any school and shows teachers parents and administrators what they can do to rebuild it Filled with case studies and other school examples *Building Community in Schools* provides the necessary intellectual framework for understanding the need to create communities that are inclusive meaningful and democratic Community Building in the Online Classroom Dominique Moysé Steinberg,2021-06-15 This book offers theories principles and strategies for developing the online classroom as a deep and full learning community that students feel is truly about by and for them To be immediately useful it offers practical ideas for helping students to actively contribute to shaping classroom affairs toward relevance and meaning However in order to elevate the discussion beyond the primer level the book anchors those ideas in social and educational principles and theories As social learning theories posit deep and full learning occurs when our full cognitive emotional and social selves are engaged This book mitigates the challenges to such engagement in the virtual classroom arguing that a strong sense of community ownership will enhance students ability to successfully master content Although not all strategies are group based the use of groups both large and small is a primary way of helping online students to become active on their own behalf in building a learning community that meets their needs Strategies outlined here focus primarily on promoting shared authority visibility and voice and on encouraging student disclosure of needs and peer connection Teaching First Grade Min Hong,2001-07 A mentor teacher shares insights strategies and lessons for teaching reading writing and math and laying the foundation for learning success *Virtual Synchronous Language Teaching and Learning* Slav Gratchev,Larry Sheret,2026-03-05 This book brings together the experiences of twelve language teaching professionals who experimented with and developed their own successful methods of teaching foreign languages during the COVID 19 pandemic including through virtual synchronous classrooms The methods presented are varied in nature but have all proven to be successful in terms of learning outcomes and satisfying for both students and their teachers The contributors disseminate their unique

teaching methods and discuss their practical applications across a range of language education contexts offering insights into what could and should be in focus in post pandemic learning and instruction environments

Productive Math Struggle John J. SanGiovanni, Susie Katt, Kevin J. Dykema, 2020-03-09 Seldom has a book been as timely or as necessary as *Productive Math Struggle* is today One of the remarkable accomplishments of SanGiovanni Katt and Dykema s work lies in how they seamlessly connect the research on high quality tasks high expectations identity and equity to productive math struggle This is perhaps their greatest contribution The authors see productive math struggle as a critical feature of mathematics classrooms that support access equity and empowerment specifically arguing that every student is worthy of struggle From the Foreword by Matt Larson Ph D Past President 2016 2018 National Council of Teachers of Mathematics Associate Superintendent for Instruction Lincoln Public Schools Nebraska Struggle is hard Productive struggle is power All students face struggle and they should it is how they learn and grow The teacher s job is not to remove struggle but rather to value and harness it helping students develop good habits of productive struggle But what s missing for many educators is an action plan for how to achieve this especially when it comes to math Persevering through difficult challenges to reach new learning is the core of *Productive Math Struggle* When left unsupported struggle can become unproductive and demoralizing negatively influencing students

mathematical identities The authors guide teachers through six specific actions including valuing fostering building planning supporting and reflecting on struggle to create a game plan for overcoming obstacles by sharing Actionable steps activities and tools for implementation Instructional tasks and vignettes representative of each grade level Real world examples showcasing classroom photos and student work samples A book study guide is available under the Free Resources tab that helps math educators to learn together on how to incorporate productive math struggle in their classrooms Revolving around the idea that math is a way of thinking and understanding and not just the pursuit of answers and procedures this book empowers students to embrace productive struggle to build essential skills for learning and living both inside and outside the classroom

Effective Strategies for Building Classroom Community Jacqueline Grzywacz,2009

Visions of the Heart Susan Ammon Young,1996 Purpose The purpose of this inquiry was to examine the concept of classroom community from teachers perspectives Procedures In this qualitative inquiry purposive selection was used to identify four elementary practitioners who purposefully created classroom learning communities A series of three phenomenologically based in depth individual interviews provided the main source of data Findings Four individual participant profiles were crafted from verbatim transcripts and specific strategies used by the teachers were described along with indicators of their effectiveness and influencing factors The individual profiles of the four teachers demonstrated unique emphases as well as commonalities in their approaches to creating classroom community Final analysis of the in depth interviews led to an integrated synergistic view of classroom community Six characteristics emerged as vital elements common goals shared ownership open communication caring relationships security and sense of belonging Two underlying pervasive themes were also identified respect and responsibility The inquiry further revealed that classroom communities whose foundations are rooted in respect and responsibility are learning centered rather than student centered or teacher centered Ultimately the investigation demonstrated that the purposeful actions of individual teachers are essential to the creation of successful learning communities
