Promoting Academic Success for ESL Students Virginia P. Collier, 1995 Narrowing the Academic Achievement Gap Greg Kabara, Brenda Turner, 2017 Student academic self efficacy is a multi faceted construct built on the reciprocal dimensions of self influences social influences academic outcomes teacher expectations which impact student academic achievement Based on the literature the academic achievement gap between Black and White students is widening making the understanding of the relationship between these dimensions a worthy pursuit for schools This research study was designed with the purpose of determining the factors that assist Black students in narrowing the academic achievement gap in high school The study focused on examining the factors that contribute to Black students academic self efficacy and teacher expectations for student academic achievement A sequential mixed method case study was used to research Black student academic success through academic self efficacy N 258 student interviews N 6 and teacher interviews N 6 A survey measuring students levels of academic self efficacy was developed piloted validated and employed for this study Student academic achievement was measured by ACT and GPA These data were triangulated through face to face student interviews focused on academic self efficacy and face to face teacher interviews focused on teacher expectations Non parametric Mann Whitney U tests of independent means revealed higher levels of academic self efficacy for White students compared to Black students and students with high academic achievement compared to students with low academic achievement Logistic regressions determined a moderate relationship between students academic self efficacy and ACT score and academic self efficacy and GPA A Mann Whitney U test of independent means revealed higher levels of ACT scores and GPA for students with high academic self efficacy compared to those students with low academic self efficacy Based on the findings of the

study students who possessed higher levels of academic self efficacy were more likely to attain higher levels of academic achievement The factors that contributed to building academic self efficacy were positive student teacher relationships consistent and high academic expectations and positive experiences Given current school structures school leaders should work to close the academic achievement gap and focus on increasing student academic self efficacy by eliminating barriers that negatively impact student academic achievement

Building Trust and Resilience among Black Male High School Students Stuart Rhoden,2018-07-03 Centered on a case study of a mid Atlantic charter school this book identifies the key factors that help Black male students navigate high school in spite of traditional and historical barriers Rather than examining their experiences through a deficit model this book adds to the growing body of data on the importance of positive role models including parents peers teachers and administrators in facilitating socio emotional and academic success at the secondary and postsecondary level Rhoden demonstrates that encouraging trust and persistence in Black male students are essential components to positive academic and social achievement in the face of perceived and real structural inequalities
