## **Building Careers Without College:**

**Cool Careers Without College for People Who Can Build Things** Heather Moore Niver,2013-12-15 Finding a career out of high school based on one's interests especially something as general as liking to build things isn't always easy. However, this title gives readers a variety of avenues to consider. Readers can consider careers as a gardener, sculptor, tailor, carpenter, and even doll maker. Not only can they learn how to break into these fields, but each section has a listing of resources to further their research. With this title, young people just out of high school can take that ever-important first step on their way to a career. *Building* Peggy J. Schmidt, Brooke Stoddard, 1994. Ideal solutions for job seekers without a college degree.

**Cool Careers Without College for People Who Love to Build Things** Joy Paige, 2002-01-15. Discusses how you can get into building items without going to college.

**Building America's Skilled Technical Workforce** National Academies of Sciences, Engineering, and Medicine, National Academy of Engineering, Division of Behavioral and Social Sciences and Education, Policy and Global Affairs, Board on Science Education, Board on Higher Education and Workforce, Board on Science, Technology, and Economic Policy, Committee on the Supply Chain for Middle-Skill Jobs: Education, Training, and Certification Pathways, 2017-05-04. Skilled technical occupations defined as occupations that require a high level of knowledge in a technical domain but do not require a bachelor's degree for entry are a key component of the U.S. economy. In response to globalization and advances in science and technology, American firms are demanding workers with greater proficiency in literacy and numeracy as well as strong interpersonal, technical, and problem-solving skills. However, employer surveys and industry and government reports have raised concerns that the nation may not have an adequate supply of skilled technical workers to achieve its competitiveness and economic growth objectives. In response to the broader need for policy information and advice, *Building America's Skilled Technical Workforce* examines the coverage, effectiveness, flexibility, and coordination of the policies and various programs that prepare Americans for skilled technical jobs. This report provides action-oriented recommendations for improving the American system of technical education, training, and certification.

*Internship & Volunteer Opportunities for People Who Love to Build Things* Laura La Bella, 2012-12-15. Internships and volunteer positions offer young people a unique opportunity not only to test their interest in and aptitude for certain career paths but to also begin the process of career building in their desired fields. In a time of economic hardship and a tight job market, having the kind of hands-on experience provided by internships and volunteer work can be the decisive factor in an employer's decision to hire one candidate among many other applicants. This book surveys all of the many internship and volunteer opportunities available for those who like to build things, including shipbuilding and instrument making, to cabinetry and furniture making, to civil engineering and architecture. In addition to discussing how to land, keep, and leverage an internship or volunteer position, the book also details the educational and training paths that should be pursued to optimize chances of success in the various professional fields.
