Edmund P. Fowler

Building Cities That Work:

Building Cities that Work Edmund P. Fowler,1993 Since 1945 North Americans have spent hundreds of billions of dollars on urban development literally transforming the landscape of the continent This development has been disastrous Edmund Fowler maintains because it is inordinately expensive destructive of the environment and disruptive of healthy social life and authentic politics Revealing the connections between our basic cultural beliefs and why we build the way we do he stresses that to build cities that work we must become aware of how our personal choices contribute to the form of the built environment

Buildings Cities Life Eberhard Zeidler,2013-08-26 Renowned architect Eberhard Zeidler tells his story in a two volume book that explores his early life in Germany and his years in Canada after he moved there in 1951 Architect of Toronto s Eaton Centre and Trump International Hotel and Tower Zeidler has left his stamp on the urban landscape of Canada the United States and the rest of the world

Building Cities That Work Edmund P. Fowler,1990-07-01 Using Jane Jacobs critique of postwar city building as a starting point Fowler shows that recent North American urban development has been characterized by development projects on a massive scale an indiscriminate use of vast areas of land and an increasingly evident homogeneity These are characteristics Fowler argues of a perverse and unnatural way of building that is wrecking the planet and enfeebling our social and political networks In exploring how the built environment contributes to social problems Fowler used Toronto as a case study conducting extensive field work in nineteen areas of the city He shows not only that postwar building was the result of conscious public policy but goes further arguing that our cities reflect deep seated insecurities and cultural malaise in surprisingly direct ways
