Building Pathology Principles And Practice:

Building Pathology David S. Watt, 2009-05-12 Building pathology provides an interdisciplinary approach to the study of defects and performance in order to develop appropriate remedial and management solutions. It considers how the structure and materials of a building relate to its environment, its occupants, and the way the building is used, so as to develop a better understanding of building failures. This book provides a well-illustrated introduction to the discipline of building pathology, bridging the gap between current approaches to the surveying of buildings and the detailed study of defect diagnosis, prognosis, and remediation. It features a number of case studies and a detailed set of references and further reading. This second edition has been updated to reflect changes in legislation, guidance, and construction, and provides new case studies that demonstrate the breadth and depth of the subject.

Building Pathology David S. Watt, 2025-04-21 Well-illustrated introduction to building pathology, bridging the gap between building surveying and the detailed understanding of building defects, their prognosis, and remediation. Building Pathology introduces the concept of building pathology and aims to give the reader a greater awareness and understanding of buildings and their users to assist in defect diagnosis and the design and implementation of specific and appropriate remedial measures. By focusing on the process rather than specific solutions, the book helps the reader to use the information in their practice in a wide variety of situations. The new third edition features new case studies which have been integrated into the text. Written by a highly qualified author with significant experience in the field, the third edition of Building Pathology contains information on Building performance, covering environmental factors, user requirements, building structures and materials, Defects, damage and decay, covering atmospheric and climatic action, excess moisture, chemical, physical, and biological action, movement, fire, and human factors, Survey and assessment, covering building inspections and surveys, how to prioritize defects, unoccupied buildings and sites, and redundant and ruined buildings, Remediation in practice, covering real-world examples. With comprehensive coverage of the subject, Building Pathology is an essential learning resource for students of building surveying, as well as professional architects, building surveyors, property managers, and those working in heritage disciplines.

Surveying Historic Buildings David Watt, 2015-07-17 This bestselling book has been fully revised and updated to include valuable new case studies and examples which help to demonstrate the common problems found in older buildings. It features many additional photographs illustrating the decay mechanisms and individual issues associated with damp, timber decay, masonry defects, roofing problems, and many other aspects. The book begins by summarizing the basics of surveying practice, including the inspection, assessment, defect diagnosis, and monitoring of defects. It then examines the building elements, discussing their construction, typical faults, and their diagnoses. This section provides specific advice on assessing industrial monuments and features concise inspection checklists for ease of reference. In the final section, the author looks to the future, considering the specific challenges faced by property professionals when employed to survey historic buildings. The book is accompanied by comprehensive appendices, including sample survey forms.

and a list of useful contacts is followed by an extensive bibliography This book will be of particular interest to conservation officers surveyors architects archaeologists and planners Building Surveys and Reports James Douglas,2010-12-13 This book provides guidance on building survey work for typical residential commercial and industrial buildings with advice on how to diagnose a wide range of defects It considers both modern and older construction methods together with new and traditional materials The particular problems of alteration and renovation work are discussed with guidance on how to carry out measured surveys A separate chapter covers survey problems after flood and fire damage and the legal section takes account of recent developments in case law relating to inspections and surveys of properties This new edition continues to provide a thorough treatment of all the key issues relating to surveying buildings dealing with the problems that surveyors are likely to encounter when inspecting buildings Changes for the new edition include Examples and references have been updated Evaluation of condition rating systems for domestic and commercial buildings A new section on the home condition reports More information on slate defects Bibliography revised and expanded to make it more comprehensive Additional appendix showing the home condition report format Understanding Building Failures James Douglas,Bill Ransom,2007-05-18 This new edition of the classic textbook provides a solid introduction to the study of defects in buildings and subsequently to good practice conservation and repair With new material this is an excellent practitioner and student reference book Photogrammetric Survey for the Recording and Documentation of Historic Buildings Efstratios Stylianidis,2020-08-16 This book provides state of the art information on photogrammetry for cultural heritage exploring the problems and presenting solutions that are applicable under real world conditions and in various disciplines Allowing readers to gain a basic understanding of cultural heritage documentation and practical image based modelling techniques it focuses on the use of photogrammetry to enhance the documentation of historic buildings in order to reflect the international trends and meet demands of the preservation community Addressing heritage documentation from various perspectives the book will appeal students and researchers from engineering backgrounds as well as from the arts and humanities
