Axis Cavalry in World War II Jeffrey T. Fowler,2001-11-25 It is often forgotten that the German Wehrmacht of 1939-45 relied heavily upon horses Not only was the majority of Army transport and much of the artillery dependent on draught horse teams the Germans also kept a horse mounted cavalry division in the field until the end of 1941 After withdrawing it they discovered a need to revive and greatly expand their cavalry units in 1943-45 The Army and Waffen SS cavalry proved their worth on the Russian Front supported by other Axis cavalry contingents Romanian Hungarian Italian and locally recruited In this book an experienced horseman describes that last generation of horse soldiers in a text supported by tables photographs and meticulous colour plates

Learning under Fire James S. Powell,2010-03-15 Thrown into the heart of war with little training and even less that would apply to the battles in which they were engaged the units of the 112th Cavalry Regiment faced not only the Japanese enemy but a rugged environment for which they were ill prepared They also grappled with the continuing challenge of learning new military skills and tactics across ever shifting battlefields The 112th Cavalry Regiment entered federal service in November 1940 as war clouds gathered thick on the horizon By July 1942 the 112th was headed for the Pacific theater As the war neared its end the regiment again had to shift its focus quickly from an anticipated offensive on the Japanese home islands to becoming part of the occupation force in the land of a conquered enemy James S Powell thoroughly mines primary documents and buttresses his story with pertinent secondary accounts as he explores in detail the ways in which this military unit adapted to the changing demands of its tactical and strategic environment He demonstrates that this learning was not simply a matter of steadily building on experience and honing relevant skills It also required discovering shortcomings and promptly taking action to improve often while in direct contact with the enemy

the Apocalypse David R Dorondo,2012-05-15 Despite the enduring popular image of the blitzkrieg of World War II the German Army always depended on horses It could not have waged war without them While the Army's reliance on draft horses to pull artillery supply wagons and field kitchens is now generally acknowledged D R Dorondo's *Riders of the Apocalypse* examines the history of the German cavalry a combat arm that not only survived World War I but also rode to war again in 1939 Though concentrating on the period between 1939 and 1945 the book places that history firmly within the

larger context of the mounted arm's development from the Franco-Prussian War of 1870 to the Third Reich's surrender. Driven by both internal and external constraints to retain mounted forces after 1918, the German Army effectively did nothing to reduce, much less eliminate, the preponderance of non-mechanized formations during its breakneck expansion under the Nazis after 1933. Instead, politicized command decisions, technical insufficiency, industrial bottlenecks, and finally wartime attrition meant that Army leaders were compelled to rely on a steadily growing number of combat horsemen throughout World War II. These horsemen were best represented by the 1st Cavalry Brigade, later Division, which saw combat in Poland, the Netherlands, France, Russia, and Hungary. Their service, however, came to be cruelly dishonored by the horsemen of the 8th Waffen-SS Cavalry Division, a unit whose troopers spent more time killing civilians than fighting enemy soldiers. Throughout the story of these formations and drawing extensively on both primary and secondary sources, Dorondo shows how the cavalry's tradition carried on in a German and European world undergoing rapid military industrialization after the mid-nineteenth century. And though *Riders of the Apocalypse* focuses on the German element of this tradition, it also notes other countries continuing and, in the case of Russia, much more extensive use of combat horsemen after 1900. However, precisely because the Nazi regime devoted so much effort to portray Germany's armed forces as fully modern and mechanized, the combat effectiveness of so many German horsemen on the battlefields of Europe until 1945 remains a story that deserves to be more widely known. Dorondo's work does much to tell that story.

Soviet Cavalry Operations During the Second World War John S. Harrel, 2019-09-30 The author of *The Nisibis War* analyzes the Red Army's usage of horse-mounted units along the Soviet-German Eastern Front during World War II. While the development of tanks had largely led to the replacement of cavalry in most armies by 1939, the Soviets retained a strong mounted arm. In the terrain and conditions of the Eastern Front, they were able to play an important role denied them elsewhere. John Harrel shows how the Soviets developed a doctrine of deep penetration using cavalry formations to strike into the Axis rear, disrupting logistics and lines of communication, encircling and isolating units. Interestingly, he also shows that this doctrine did not stem from the native cavalry tradition of the steppe but from the example of the American Civil War. The American approach was copied by the Russians in WWI and the Russian Civil War, refined by the Soviets in the early stages of World War Two and perfected during the last two years of the war. The Soviet experience demonstrated that deep operations cavalry raids against enemy rear echelons set the conditions for victory. Although the last horse-mounted units disappeared in the 1950s, their influence led directly to the formation of the Operational Manoeuvre Groups that ironically faced US forces in the Cold War. An expansive analysis of the technical, tactical, and operational employment of Soviet cavalry against the Germans and their Axis allies. For

practitioners who want to understand the history and development the book is a goldmine of overlooked campaigns and actions The book s dense and detailed presentation makes it valuable to operational planners and those interested in the Soviet German war ARMOR Magazine *The U.S. Army's Mechanized Cavalry Doctrine in World War II* Louis A.
