Celestial Navigation:

Celestial Navigation in the GPS Age John Karl, 2007 Many books on celestial navigation take shortcuts in explaining concepts incorrect diagrams and discussion are often used for the sake of moving the student along quickly This book tells the true story and the whole story It conveys celestial navigation concepts clearly and in the shortest possible time It is tailored for navigation in the GPS age a time of computers calculators and web resources Although it covers all of the traditional methods of working a sight the primary thrust is using the under 10 scientific calculator By using equations that you key into your calculator this book guides you toward a better understanding of the concepts of celestial navigation You will learn novel ways to plot lines of position ways to check your sextant accurately by star sights and how to tell what time it is from a moon sight The many appendices are a treasure of references and explanations of abstract ideas Celestial Navigation is a crucial skill for the offshore navigator to know this book provides the shortest path to that knowledge

Celestial Navigation Jeff Toghil, 1986-06-03 To the uninitiated celestial navigation appears to be a somewhat frightening exercise in mathematics In fact the maximum mathematics involved in the new sight reduction systems is the addition of three lines of figures Similarly the apparent complexities of the solar and stellar systems take on a less frightening appearance when related to the lighthouses and similar earthly objects used for coastal navigation Throughout this book the author uses such a comparison between earthly and heavenly objects in explaining the close relationship between coastal and celestial navigation In doing so he reduces a complex subject to a simple and interesting one that can be absorbed by even the most non mathematically minded The book concentrates for much of its length on the plotting of the boat's position by sun planets and stars when out of sight of land It also deals with related navigational routines such as checking the compass by using heavenly objects taking radio time signals and adjusting the sextant for day to day corrections This is celestial navigation in its simplest form presented in a way which even the most amateur navigator can understand and absorb

generation of students He will share his proven method here for the first time While many books on celestial navigation insist this age old art is needed only when electronics fail Berson uses a unique approach that allows boaters to combine both the modern and the traditional No other books does that In Celestial Navigation as he does in his popular column and classes Berson simplifies the math that so often frightens and deters potential students Berson takes the same approach with his writing that he does with his classes and columns informal true life anecdotes that entertain as well as educate To Berson celestial navigation is personal and valuable Anyone reading this book will catch his contagious enthusiasm Skyhorse Publishing as well as our Sports Publishing imprint is proud to publish a broad range of books for readers interested in sports books about baseball pro football college football pro and college basketball hockey or soccer we have a book about your sport or your team In addition to books on popular team sports we also publish books for a wide variety of athletes including books on running cycling horseback riding swimming tennis martial arts golf camping hiking boating and so much more While not every title we publish becomes a New York Times bestseller or a national bestseller we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home
