

How the Tik Tok Algorithm Works

1. First-time users are shown 8 popular videos featuring different trends, music, and topics.

2. The algorithm identifies similar videos based on a user's engagement with those videos and interactions which includes:

Captions, Hashtags, Sounds, Device

Account settings, Country settings

Language preferences

3. Once sufficient data is collected clusters of users with similar interests are formed

4. Machine learning is used to distribute content to users based on proximity to other clusters

5. TikTok keeps users entertained by not showing repeat videos, music, or content creators
