## **Between Consent And Dissent:**

The Paradox of Consensualism in International Law C.L. Lim, O.A. Elias, 2024-01-15 If international law is derived from the consent of States who should be in a better position to say what has been consented to than the disputing States themselves It seems that if the doctrine of consent is taken seriously there would be no room for an objective legal answer to the question What is law Furthermore States do not necessarily employ the same criteria for determining the applicable law when engaged in dispute And the doctrine of sovereignty is of very limited utility since not all of substantive international law can be explained in terms of the atomic concept of sovereignty This leaves consent as the mediating concept between the substantive doctrine of international law on the one hand and the actual practice of States and others whose practice and participation in the global legal order help shape the body of international laws on the other Nevertheless this is not to say that there is nothing higher than the actual legal claims forwarded by international actors International law is no mere superstition since none argue that there is no one legal solution In that sense the unity of the international legal order is preserved The problem is that the solutions actually forwarded in dispute are too numerous and international law too abstract to serve as arbiters between the competing claims Thus at the level of substantive doctrine there is a fragmentation of that earlier mentioned picture of unity But even here only consent can mediate between unity and fragmentation stability and change order and justice legislation and revolution The strength of international law lies in its adaptability to political strategic and diplomatic necessities To suggest otherwise is to depart from a picture of international law that presumes the empirical verifiability of international laws This book has as its principal concern certain orthodoxies of source thinking in international law and is aimed at working out the implications of these It aims to show how certain theoretical conceptions have shaped the law in action for good or ill It will appeal to political theorists diplomats global decision makers and international lawyers who are interested in the question What can we do with the international law that we have as distinct from the question What should we do with international law *Consent, Dissent, and Patriotism* Margaret Levi, 1997-10-13 Democratic governments are able to elicit legally and legitimately both money and men from their populations Certainly there is tax evasion draft evasion and even outright resistance yet to a remarkable extent citizens acquiesce and even actively consent to the demands of governments well beyond the point explicable by coercion This is a puzzle for social scientists particularly those who believe that individuals are self interested rational actors who calculate only the private egoistic costs and benefits of possible choices The provisions of collective good should never justify a quasi voluntary tax payment and the benefits of a war could not possibly exceed the cost of dying This book explains the institutionalization of policy in response to anticipated and actual citizen behaviour and the conditions under which citizens give refuse and withdraw their consent Professor Levi claims that citizens consent is contingent upon the perceived fairness of both the government and of other citizens Most citizens of democracies most of the time are more likely to give their consent if they

believe that government actors and other citizens are behaving fairly toward them

**The Redress of Law** Emiliios Christodoulidis, 2021-04-15 From a legal philosophical point of view The Redress of Law presents a critical analysis of a number of related doctrinal fields constitutional labour and EU Law Focusing on the organisation and protection of work this book asks what it means to protect work as an essential aspect of human individual and collective flourishing This is an ambitious and highly sophisticated intervention in contemporary academic and political debates around a set of critically important questions connected to processes of globalisation and market integration The author redefines the nature of legal and political thought in an age in which market rationality has exceeded its classic domain and has come to pervade the organization of social and political life This restatement of critical legal theory is intended to defend the concept of constitutionalism and suggest new ways to deploy the law strategically
