Education in the Best Interests of the Child R. Brian Howe, Katherine Covell, 2013-02-07 A large body of research in disciplines from sociology and policy studies to neuroscience and educational psychology has confirmed that socioeconomic status remains the most powerful influence on children's educational outcomes. Socially disadvantaged children around the world disproportionately suffer from lower levels of educational achievement which in turn leads to unfavourable long term outcomes in employment and health. Education in the Best Interests of the Child addresses this persistent problem which violates not only the principle of equal educational opportunity but also the broader principle of the best interests of the child as called for in the UN Convention on the Rights of the Child. Building on the children's rights work accomplished in their previous book *Empowering Children* Brian Howe and Katherine Covell identify three types of reform that can significantly close the educational achievement gap. Their findings make an important argument for stronger and more comprehensive action to equalize educational opportunities for disadvantaged children.

Corruption on the Astral Plane Jimi Roma, 2012-12-12 Four people have been leaving bits of writing up a tree. On the ground defences are being built. Meanwhile the government is minding its own business trying to build a road and assembling a conscript army of private detectives and security guards to protect it. You may not believe in global warming. You may not be worrying about it. You may have air conditioning in your SUV. But some people have had a dream. That people can live off the planet and let the planet live on. That we can get over our obsession with progress. That we don't need growth and greed to make us fat and lazy. Others have been taking that dream away. Or perhaps they put it there in the first place. This is a story of ordinary people taking political action for the environment. I suppose you could call it science fiction.
