## **Between Genius And Genocide:**

*Between Genius And Genocide* Daniel Charles, 2011-03-31 In January 1934 as Hitler's shadow began to fall across Europe a short bald man carrying a German passport arrived at the Hotel Euler in Basle. He seemed haunted and restless as though he urgently needed to be elsewhere. Fritz Haber, Nobel laureate in chemistry, confidante of Albert Einstein and German war hero, had arrived in Basle a broken man and three days later he died, leaving an uncertain legacy. For some, the great German chemist was a benefactor of humanity, winner of a Nobel prize for inventing a way to nourish farmers' fields with nitrogen captured from the air. For others, he was a war criminal who personally supervised the unleashing of chlorine clouds against British, French, and Canadian troops in World War I. Tragedy marked his life. A week after the first gas attack in 1915, Haber's wife took his pistol and shot herself. And in 1933, when Hitler came to power, the Jew Haber was among the first scientists driven out of Germany. Within a year, Haber was dead, denied honour both in his homeland and abroad. No life reveals the moral paradox of science, its capacity to create and destroy more clearly than Fritz Haber's. *Between Genius and Genocide* is a story filled with ambition, patriotism, hubris, and tragedy, set amidst huge technological advances, arms races, mounting imperialism, and war.

*The Chemists' War* Michael Freemantle, 2015 The 1914-18 war has been referred to as the chemists' war, and to commemorate the centenary, this collection of essays will examine various facets of the role of chemistry in the First World War. Written by an experienced science writer, this will be of interest to scientists and historians with an interest in this technologically challenging time.

Plus free online access to the full content of this remarkable reference set is available. The printed reference includes four volumes including 2,048 pages, 409 essays and 409 sidebars, hundreds of photos, illustrations and graphs and appendixes, indexes and resource listings. Features of the online subscription include fully supported complimentary online access, unlimited users at your library, full access from home or dorm room, immediate access via online registration, a simple intuitive interface, user profile areas for students and patrons, sophisticated search functions, complete content including appendixes and fully illustrated Great Lives from History. **Inventors and Inventions** features 409 essays covering 413 individual inventors including 27 women from all time worldwide. All essays were written specifically for this new publication. The editors have included in this set those inventors recognized for shaping modern technology and the way we live today, coverage that is essential in any liberal arts curriculum. The editor's criteria for including these individuals in this publication took into account their fame as inventors, the significance of their inventions, the amount of time they spent inventing, their representation of world inventors, their relevance to class curricula and their interest to high school, undergraduate and general readers. For purposes of this publication, the term invention was defined to include not only mechanical and other physical devices but also processes, e.g. the Bessemer process for making steel, software such as Grace Hopper's invention of COBOL and systems such as those applied to business management. Pure scientific theories such as laws of physics were excluded, although rare exceptions were made for such systems and tools that have had a comprehensive influence on our way of interacting with the world, such as Aristotle's invention of the first system of biological taxonomy, Newton's creation of the calculus and Einstein's theories of relativity.
