Between Past Present:

Rome: Continuing Encounters between Past and Present Dorigen Caldwell, 2016-12-05 Few other cities can compare with Rome's history of continuous habitation nor with the survival of so many different epochs in its present. This volume explores how the city's past has shaped the way in which Rome has been built, rebuilt, represented, and imagined throughout its history. Bringing together scholars from the disciplines of architectural history, urban studies, art history, archaeology, and film studies, this book comprises a series of studies on the evolution of the city of Rome and the ways in which it has represented and reconfigured itself from the medieval period to the present day. Moving from material appropriations such as spolia in the medieval period through the cartographic representations of the city in the early modern period to filmic representation in the twentieth century, we encounter very different ways of making sense of the past across Rome's historical spectrum. The broad chronological arrangement of the chapters and the choice of themes and urban locations examined in each allows the reader to draw comparisons between historical periods. An imaginative approach to the study of the urban and architectural make-up of Rome, this volume will be valuable not only for historians of art and architecture but also for students of cultural history and film studies.

Introduction to Anticipation Studies Roberto Poli, 2017-08-28 This book presents the theory of anticipation and establishes anticipation of the future as a legitimate topic of research. It examines anticipatory behavior, i.e., a behavior that uses the future in its actual decisional process. The book shows that anticipation violates neither the ontological order of time nor causation. It explores the question of how different kinds of systems anticipate and examines the risks and uses of such anticipatory practices. The book first summarizes the research on anticipation conducted within a range of different disciplines and describes the connection between the anticipatory point of view and futures studies. Following that, its chapters on Wholes, Time, and Emergence make explicit the ontological framework within which anticipation finds its place. It then goes on to discuss Systems, Complexity, and the Modeling Relation and provides the scientific background supporting anticipation. It restricts formal technicalities to one chapter and presents those technicalities twice, in formal and plain words, to advance understanding. The final chapter shows that all the threads presented in the previous chapters naturally converge toward what has come to be called Discipline of Anticipation.

Hidden in Historicism Harry Jansen,2020-06-10 *Hidden in Historicism* considers how the nineteenth century philosophy of historicism depicts three forgotten time regimes a time of rise and fall an ambiguous time of synchronicity of the non synchronous and a time in which decisive moments dominate Before the eighteenth century time was past oriented This inverted in the Enlightenment when the future became dominating Today this time of progress continues to be embraced as a time of the modern Yet inequality increasing violence and climate change lead to doubts over a bright future In this book Harry Jansen moves away from the heritage of Reinhart Koselleck and his single time of the modern towards a historicist threefold temporal approach to history writing In the time regime of the twenty first century past present and future coexist It is a heterogeneous time that takes on the three forms of historicism Jansen s study shows how all three times exist together in current historiography and contribute to a better understanding of the world today Based on the idea that an incarnated time rules everything that happens it reality the book offers a fresh perspective on the ongoing discussion about time and time regimes in contemporary philosophy and theory of history for students and scholars both time specialists and the non specialist
