Unilateralism and U.S. Foreign Policy David Malone, Yuen Foong Khong, 2003 The authors explore international reactions to U S conduct in world affairs

The U.S. City in Transition Barbara Hahn, 2022-07-21 The U S city is undergoing constant change In the East and Midwest most cities were founded as trading posts on waterways They boomed during the industrial era and reached their population peak in the mid 20th century before suburbanization and deindustrialization caused them to decline in importance Traces of decay were everywhere and the prognosis for the future was conceivably poor As Barbara Hahn shows in her book this trend now seems to have been broken Things are looking up again for the US city Some of the former industrial cities have succeeded in structural change In the south and west of the country cities have developed into new growth centers However not all cities are benefiting from this positive development and many continue to shrink at an alarming rate As the author points out similar processes such as neoliberalisation deregulation privatisation and gentrification can be observed in all cities regardless of their location and level of development Due to the large number of didactically prepared graphics the book is suitable as a study read for students and scholars The characteristics of the U S city which are elaborated on the basis of current examples as well as the illustrative photos also illustrate the change of the U S city to the interested reader
