Abstract

The subject of the poster would be on the 2003 Advanced Lighting Guidelines and what has been updated. What are the Advanced Lighting Guidelines?

The updated Advanced Lighting Guidelines (2003 Edition) are the definitive resource on how to achieve good lighting, containing up-to-date information on lighting applications and lighting system performance. The 2003 Edition provides in-depth information on lighting and human performance, lighting impacts and policies, design considerations and applications, light sources and ballast systems, luminaires and light distribution, and lighting controls.

Who uses the Advanced Lighting Guidelines: 2003 Edition?

Whether you're a building owner interested in the productivity benefits associated with daylighting, or a lighting designer wanting to specify the most effective system for a particular application, the 2003 Edition provides the information you need. They are used by:

- Electrical engineers and contractors
- Facility engineers and managers
- Utility program managers

Background

The Advanced Lighting Guidelines were first developed in 1991 by the California Energy Commission to dispel myths about new and emerging advanced lighting technologies. The second edition was published in 1993 by a partnership of the California Energy Commission, the Electric Power Research Institute and the U. S. Department of Energy. In 2001, the New Buildings Institute published the third edition of the Advanced Lighting Guidelines through a multi-client agreement.

The 2003 Edition maintains the wealth of information contained in the 2001 Edition and provides an updated "Applications" chapter, including an array of visual depictions of lighting design solutions for offices, conference rooms, grocery stores, big box and boutique retail stores, school classrooms and gas stations.
