## **Comprehensive Toxicology:**

*Comprehensive Toxicology*, 2010-06-01 An explosive increase in the knowledge of the effects of chemical and physical agents on biological systems has led to an increased understanding of normal cellular functions and the consequences of their perturbations The 14 volume Second Edition of *Comprehensive Toxicology* has been revised and updated to reflect new advances in toxicology research including content by some of the leading researchers in the field It remains the premier resource for toxicologists in academia medicine and corporations *Comprehensive Toxicology* Second Edition provides a unique organ systems structure that allows the user to explore the toxic effects of various substances on each human system aiding in providing diagnoses and proving essential in situations where the toxic substance is unknown but its effects on a system are obvious *Comprehensive Toxicology* Second Edition is the most complete and valuable toxicology work available to researchers today Contents updated and revised to reflect developments in toxicology research Organized with a unique organ system approach Features full color throughout Available electronically on sciencedirect com as well as in a limited edition print version

*Comprehensive Toxicology*, 2017-12-01 *Comprehensive Toxicology* Third Edition Fifteen Volume Set discusses chemical effects on biological systems with a focus on understanding the mechanisms by which chemicals induce adverse health effects Organized by organ system this comprehensive reference work addresses the toxicological effects of chemicals on the immune system the hematopoietic system cardiovascular system respiratory system hepatic toxicology renal toxicology gastrointestinal toxicology reproductive and endocrine toxicology neuro and behavioral toxicology developmental toxicology and carcinogenesis also including critical sections that cover the general principles of toxicology cellular and molecular toxicology biotransformation and toxicology testing and evaluation Each section is examined in state of the art chapters written by domain experts providing key information to support the investigations of researchers across the medical veterinary food environment and chemical research industries and national and international regulatory agencies Thoroughly revised and expanded to 15 volumes that include the latest advances in research and uniquely organized by organ system for ease of reference and diagnosis this new edition is an essential reference for researchers of toxicology Organized to cover both the fundamental principles of toxicology and unique aspects of major organ systems Thoroughly revised to include the latest advances in the toxicological effects of chemicals on the immune system Features additional coverage throughout and a new volume on toxicology of the hematopoietic system Presents in depth comprehensive coverage from an international author base of domain experts

*Comprehensive Toxicology: Biotransformation* Charlene A. McQueen, 2010

*Comprehensive Toxicology: Nervous system and behavioral toxicology* Charlene A. McQueen, 2010 *Comprehensive Toxicology* I.G. Sipes, Charlene A. McQueen, A.J. Gandolfi, 1997-07 *Comprehensive Toxicology* the first comprehensive reference work in toxicology is an in depth state of the art review of toxicology of unrivalled quality It is designed to encompass investigation from a molecular level to the intact organism Presented in a 13 volume printed form

**Comprehensive Toxicology: Toxicology of the immune system** I. Glenn Sipes,1997 This volume in the Comprehensive Toxicology series demonstrates how the use of extremely powerful molecular and cell biology techniques has stimulated the growth of toxicology as a scientific discipline The field of toxicology has evolved from its earlier days of in vivo and descriptive studies to focusing on mechanisms Frequently mechanisms require an examination at the cellular and molecular level Molecular toxicology has opened the door to comprehending the basic mechanisms of how toxicants show their effects The volume is a comprehensive integrated profile of the molecular effects of toxicants and the molecular mechanisms involved in producing cellular and tissue injury

**Comprehensive Toxicology: Toxicological testing and evaluation** I. Glenn Sipes,1997 This volume in the Comprehensive Toxicology series demonstrates how the use of extremely powerful molecular and cell biology techniques has stimulated the growth of toxicology as a scientific discipline The field of toxicology has evolved from its earlier days of in vivo and descriptive studies to focusing on mechanisms Frequently mechanisms require an examination at the cellular and molecular level Molecular toxicology has opened the door to comprehending the basic mechanisms of how toxicants show their effects The volume is a comprehensive integrated profile of the molecular effects of toxicants and the molecular mechanisms involved in producing cellular and tissue injury

Comprehensive Toxicology Series Sipes,Gandolfi,McQueen,1998-06-05 Comprehensive Toxicology is an in depth state of the art review of toxicology with an emphasis on human systems This set of volumes has been designed to encompass investigation from the molecular level to the intact organism The goal is to provide a balanced presentation that integrates specific biological effects of pertinent toxicants across the various disciplines of toxicology In planning Comprehensive Toxicology the needs of a wide range of potential users were considered Consequently each area will include a thorough review as well as the latest scientific data and interpretation The 13 Volume Set is available together with the CD ROM The CD ROM version provides the additional benefit of a sophisticated search engine The CD ROM software is intuitive for the end user so no experience or training is required

**Comprehensive Toxicology, Volume 6** S.P. Bishop,W.D. Kerns,1999-08-04 This volume contains a comprehensive review of basic cardiovascular anatomy physiology and pharmacology as well as a detailed analysis of the various classes of compounds affecting the heart and blood vessels Cardiovascular biology will include embryologic development physiology and molecular pharmacology of the system Methods for evaluation of the heart and blood vessels will be reviewed including both in vivo and in vitro methods of study Separate sections will deal with the response of the heart and blood vessels to injury with emphasis on mechanisms of toxic injury Specific compounds are classified according to their major mechanisms of toxicity and are reviewed with prime examples of those compounds for which the cellular and molecular mechanisms are best known Emphasis is on toxicologic studies in experimental animals where mechanisms have been most thoroughly investigated but the relationship of results from animal studies will be made to toxicologic lesions in man Finally there is an assessment of the problems related to the use of

toxicologic studies in animals for clinical application in man      Comprehensive Toxicology: Chemical carcinogens and anticarcinogens I. Glenn Sipes,1997 This volume in the Comprehensive Toxicology series demonstrates how the use of extremely powerful molecular and cell biology techniques has stimulated the growth of toxicology as a scientific discipline The field of toxicology has evolved from its earlier days of in vivo and descriptive studies to focusing on mechanisms Frequently mechanisms require an examination at the cellular and molecular level Molecular toxicology has opened the door to comprehending the basic mechanisms of how toxicants show their effects The volume is a comprehensive integrated profile of the molecular effects of toxicants and the molecular mechanisms involved in producing cellular and tissue injury
