

Introduction to Computer Integrated Manufacturing (CIM)

1. Flexible Manufacturing System (FMS)
2. Variable Mission Mfg. (VMM)
3. Computerized Mfg. System (CMS)

Four-Plan Concept of Manufacturing

CIM System discussed:

- Computer Numerical Control (CNC)
- Direct Numerical Control (DNC)
- Computer Process Control
- Computer Integrated Production Management
- Automated Inspection Methods
- Industrial Robots etc.

A CIM System consists of the following basic components:

- I. Machine tools and related equipment
- II. Material Handling System (MHS)
- III. Computer Control System
- IV. Human factor/labor

CIMS Benefits:

1. Increased machine utilization
2. Reduced direct and indirect labor
3. Reduce mfg. lead time
4. Lower in process inventory
5. Scheduling flexibility
6. etc.

Principles of Computer-integrated Manufacturing S. Kant Vajpayee,1995 For courses in Computer Integrated Manufacturing CAD CAM Innovations in Technology and Advances in Manufacturing For Community College students or 4 year college students A unique new text whose emphasis on the underlying principles of Computer Integrated Manufacturing CIM creates a treatment that is effectively balanced between the needs of the technologist and management considerations of CIM After an introduction to the basics of CIM coverage addresses its three enabling technologies computers communications and databases Metals and Alloys followed by discussion of CIM technologies for discrete parts production A final chapter looks at emerging technologies and management innovations and their impact on the field *CIM. Computer Integrated Manufacturing* August-Wilhelm Scheer,2012-12-06 Computer Integrated Manufacturing CIM is the computerized handling of integrated operational processes between production planning and control design process planning production and quality assurance The consistent application of information technology along with modern manufacturing techniques and new organizational procedures opens up great potential for rationalization by speeding up processes thereby reducing stocks and improving product structure and delivery times Following a comprehensive justification of the CIM integration principle this book discusses the current state of applications and new demands arising from the integration principle as applied to the individual CIM components The interfaces between business and technical information processing are considered in detail The main emphasis however is on strategies for realization and implementation based on concrete experience The Y CIM information management model developed and tested at the author s institute is presented as a procedural method for

implementing CIM and demonstrated using up to date examples In addition to the procedure for developing a CIM strategy concrete sub projects are developed which are directed at specific sector or enterprise structures The survey of further CIM developments including design stage cost estimation use of expert systems and inter company process chains have proved to be effective CIM components since the first edition of this book and are now treated in the main text Six German and five American industrial implementations are presented to illustrate the diverse areas of emphasis in the implementation sequence and to indicate how CIM can be realized with currently available data processing tools

Computer Integrated Manufacturing Kiyoji Asai, I. Burhan Turksen, Gunduz Ulusoy, 2012-12-06 The Current state of expectations is that Computer Integrated Manufacturing CIM will ultimately determine the industrial growth of world nations within the next few decades Computer Aided Design CAD Computer Aided Manufacturing CAM Flexible Manufacturing Systems FMS Robotics together with Knowledge and Information Based Systems KIBS and Communication Networks are expected to develop to a mature state to respond effectively to the managerial requirements of the factories of the future that are becoming highly integrated and complex CIM represents a new production approach which will allow the factories to deliver a high variety of products at a low cost and with short production cycles The new technologies for CIM are needed to develop manufacturing environments that are smarter faster close coupled integrated optimized and flexible Sophistication and a high degree of specialization in materials science artificial intelligence communications technology and knowledge information science techniques are needed among others for the development of realizable and workable CIM systems that are capable of adjusting to volatile markets CIM factories are to allow the production of a wide variety of similar products in small batches through standard but multi mission oriented designs that accommodate flexibility with specialized software

CIM systems are beginning to settle into our society and industries with greater emphasis on the integration of economic cultural and social aspects together with design planning factory automation and artificial intelligent systems This volume of proceedings brings together 10 keynote and invited speaker addresses and over 180 papers by practitioners from 28 countries It documents current research and in depth studies on the fundamental aspects of advanced CIM systems and their practical applications The papers fall into 3 main sections CIM Related Issues Industrial AI Applications Aspects and Concurrent Engineering Advanced Design Simulation and Flexible Manufacturing Systems COMPUTER INTEGRATED MANUFACTURING ALAVUDEEN, A., VENKATESHWARAN, N., 2008-08-18 This up to date and accessible text deals with the basics of Computer Integrated Manufacturing CIM and the many advances made in the field It begins with a discussion on automation systems and gives the historical background of many of the automation technologies Then it moves on to describe the various techniques of automation such as group technology and flexible manufacturing systems The text describes several production techniques for example just in time JIT lean manufacturing and agile manufacturing besides explaining in detail database systems machine functions and design considerations of Numerical Control NC and Computer Numerical Control CNC machines and how the CIM system can be modelled The book concludes with a discussion on the industrial application of artificial intelligence with the help of case studies in addition to giving network application and signalling approaches Intended primarily as a text for the undergraduate and graduate students of mechanical production and industrial engineering and management the text should also prove useful for the professionals in the field Cim ,1991

Computer-integrated Manufacturing Handbook Eric Teicholz, Joel N. Orr, 1987 Qualification for Computer-Integrated Manufacturing Felix Rauner, 2012-12-06 In this paper a nearly perfected concept of basic training in the field of Computer Integrated Manufacturing CIM has been explained With the help of detailed studies conducted in part by the Department of Technology and Education Department of Mechanical and Industrial Engineering University of Dortmund the necessity of basic training at all levels for employees in Computer Integrated Manufacturing was verified Then the new requirements for employees were indicated with respect to the ability to act Moreover the didactic demands of the concept for basic subject specific training were clearly stipulated In summary this concept has to include the invariant indispensable fundamental and exemplary contents and the basic options of CIM work organisation which are most important today and in the near future Then a configuration was presented to meet these demands the multimedia system of the CIM Learning Factory subsidised by the EC in the COMETT programme The CIM Learning Factory consists of a well operating model factory where activities like job management production control design manufacturing including loading material transport and assembly as well as quality control and warehousing are flexibly shown in functional models and are controlled by means of cross linked computers MPC during the training the cross linked computer structure is used like a language laboratory two different teachware packages the first for the target group of designers and decision makers the second for
